Sectoral Assessments

Inception Workshop
Sofia, 1 March 2017

Robert Bakx
Project Component 2

**COMPONENT 1**
Macro-Economic Implications

**COMPONENT 2**
Sector Assessments

**COMPONENT 3**
Adaptation Strategy and Action Plan

Communication, Awareness, Capacity building (*Component 4*)

Advisory Services on a National Climate Change Adaptation Strategy and Action Plan
Sector Assessments

• 2014 ‘Climate Change Vulnerability and Risk Analysis and Assessment of Bulgaria’s Economic Sectors’

• Review, update, and add other useful information ➔ literature study
OUTLINE FOR SECTOR ASSESSMENT REPORTS

Table of contents

Abbreviations

Executive Summary

Chapter 1  Risk and vulnerability assessment and analysis

  Brief Introduction
  1.1  Sector characteristics and trends
  1.2  Past and present weather events and their consequences and response actions in the sector in Bulgaria
  1.3  Sector related climate change risks and vulnerabilities

Chapter 2  Baseline – policy context

  Brief Introduction
  2.1  State of awareness, understanding of future consequences of CC, knowledge gaps in the sector
  2.2  Experience with CCA in the sector in other (EU) countries

  2.4  Bulgarian CCA legal framework and policies in the sector
  2.5  Institutional framework and stakeholder community in Bulgaria
  2.6  Financial and human resources in Bulgaria

Advisory Services on a National Climate Change Adaptation Strategy and Action Plan
Advisory Services on a National Climate Change Adaptation Strategy and Action Plan

**Sector Assessments**

**Contents (2)**

- 2.7 Sector participation in CC(A) specific international cooperation or information exchange
- 2.8 Bulgarian sector specific ongoing and foreseen CCA (related) actions
- 2.9 Gaps and barriers hindering adequate response to CCA action

**Chapter 3 Adaptation options**

- Brief Introduction
- 3.1 Identified adaptation options
- 3.2 Experience with selecting adaptation options in the sector in other (EU) countries
- 3.3 Adaptation options assessed
- 3.4 Cross-cutting issues, trade-offs and synergies of adaptation options
- 3.5 Priority setting approach

**Annexes**

- A. ........
- B. ........
- C. List of sector specific climate change information sources
Sector Assessments

Chapter 1 – Risks and vulnerabilities

• Table of contents
• Abbreviations, Executive Summary
• Sector characteristics and trends
• Weather events affecting the sector + response
• Sector related risks and vulnerabilities
Sector Assessments

Chapter 2 - Baseline

- Awareness, understanding, knowledge gaps
- Sector experience in other EU countries
- EU legal framework and policies in the sector
- Bulgarian legal framework and policies in the sector
- Institutional framework and stakeholder community in Bulgaria
- Financial and human resources in Bulgaria
- Sector participation, actions, gaps, barriers
Sector Assessments

Chapter 3 – Adaptation Options

- Identified adaptation options
- Adaptation options in other EU countries
- Adaptation options assessed
- Cross cutting issues, trade-offs, synergies
- Priority setting approach
Good quality information is

- Accurate
- Complete
- Consistent
- Objective
- Relevant
- Interpretable
- Accessible
What is your experience with these criteria as regards information in the area of climate change adaptation?
Access to information

Are there any restrictions to obtaining the information expectedly required in support of a developing a good quality strategy and action plan as well as to run an adequate decision making process?
Thank you for your attention!
