**FY2019 ANNUAL REPORT
JAPAN/WORLD BANK GRADUATE SCHOLARSHIP PROGRAM**

I. Overview: Japan’s Investment in Human Capital in Partnership with the World Bank

Japan's commitment to invest in human resources in developing countries is rooted in its own experiences after World War II. The country's startling postwar economic growth and its fundamental transformation from World Bank recipient to major World Bank donor were grounded in the rapid growth of its broad human resource base. This distinct development pathway has led Japan in its desire to support the poorest countries in their endeavors to enhance the expertise and skill levels of aspiring practitioners and leaders and to contribute to policy reform for economic growth and social development.

Japan has partnered with the World Bank in support of this development objective over the years, including through two programs administered under the Japan-funded and World Bank–administered Policy and Human Resources Development Fund (PHRD): (i) the Japan Indonesia Presidential Scholarship Program (JIPS), which closed in FY2017 and (ii) the Joint Japan/World Bank Graduate Scholarship Program (JJ/WBGSP), which remains active.

This annual report updates activities under JJ/WBGSP.

Joint Japan/World Bank Graduate Scholarship Program (JJ/WBGSP)

JJ/WBGSP, which started in 1987, targets mid-career professionals working in development fields. The program provides financing for professionals to study abroad for up to 24 months. To date, the program has awarded over 6500 scholarships across 160 countries. Approximately every three years, the World Bank administers a survey of alumni to track their professional

achievements and development impact after they complete their JJ/WBGSP-funded studies. The JJ/WBGSP awards scholarships through three subprograms: (a) the Preferred Program, (b) the Partnership Program, and (c) the Japanese Nationals Program.

Preferred Program: Eligible developing country nationals who are admitted to one of these programs can apply for a JJ/WBGSP scholarship through an open call held once per year. The highest qualified scholarship applicants are selected, considering gender and geographic distribution of the scholars' home countries. With the number of eligible scholarship applicants always significantly greater than the number of scholarship awards granted, a preferred master's degree program is not guaranteed to receive a JJ/WBGSP-awarded scholar.

No new development topics or master's degree programs have been added to this list for many years. Instead, by attrition, the number of master's degree programs have declined over the years. In 2019, 214 preferred master's degree programs were affiliated with JJ/WBGSP (Annex 1).

Partnership Program: Rather than participating in an open call for JJ/WBGSP scholarship applications, partner universities short-list JJ/WBGSP scholarship applicants from their pool of admitted students. As long as a master's degree program short-lists twice the number of qualified applicants compared to the number of scholarships set aside for that partnership, each partner is guaranteed a fixed number of scholarships each year.

There are 14 partnership master's degree programs for which JJ/WBGSP scholarships are available for scholars who will begin their programs before July 2020. These programs are located in 13 universities, which include:

- five in Japan—the University of Tokyo, Yokohama National University, the University of Tsukuba, Keio University, and the Graduate Institute for Policy Studies;
- two in the United States—Harvard University and Columbia University; and
- six universities in Africa (the University of Yaoundé II in Cameroon, the University of Cocody –Abidjan in Côte d'Ivoire, the University of Ghana, Makerere University in Uganda, the University of Zambia, and the University of Kinshasa in the Democratic Republic of Congo).

Japan Nationals Program: There is an allocation for 15 scholarships set aside every year to finance a master or PhD degree for Japanese nationals for up to 2 years, and there is no restriction on their choice of university, as long as the graduate program focuses on a development topic.

Annex 2 provides details on the application and selection process of these three subcomponents.

II. Outreach and Selection of the 2019 Cohort of JJ/WBGSP Scholars

Overview

Funding for new scholarships has declined in recent years, and up to now the preferred program took the full brunt from these budget cuts, dropping from 136 scholarships awarded in 2015 to 43 in 2018. So to move toward a more equitable distribution of scholarships given the funding

available, in 2019 the Scholarship Program reduced the number of scholarships that would be offered for partnership programs from the longstanding quota of 110 to 77, and allocated a maximum of 56 scholarships for preferred programs (Table 1).

Table 1: Number of scholarships planned per Subprogram

	Pre-2019	2019
Partners		
Harvard	8	6
Columbia	12	10
TSUKUBA	15	8
YNU TAX	5	4
YNU INFRA	10	8
TOKYO	8	7
GRIPS	5	4
KEIO	5	4
Ghana	7	5
ZAMBIA	7	5
KINSHASA	7	3
Makerere	7	3
Yaounde	7	5
Cocody	7	5
Partners Subtotal	110	77
Japanese National	15	15
Preferred Program		56
TOTAL		148

In large part because of the lack of eligible shortlisted applicants from the African Universities, in 2019, JJWBGSP awarded only 62 scholarships for partnership programs compared to 77 scholarships planned. In contrast, with an abundance of qualified applications from the open call, all 56 of the allocated scholarships were awarded to scholars admitted to preferred programs. Unfortunately, the Japanese Nationals Program continued for a second year to struggle to attract qualified applicants, and as such, only 8 scholarships were awarded in 2019, compared to the budget for 15 scholarships to Japan nationals. Figure 1 and Tables 2a and 2b provide more detailed time-series data.

Figure 1. JJWBGSP Preferred and Partnerships Awards, 1988-2019

Table 2a: Status of Awardees

(*) Includes scholars that deferred from the year before

Japanese Nationals Program: Outreach and Selection

The Secretariat, DEC's Communications team and the Bank's Tokyo office, continued to reach out to the target audience through websites, social media and face-to-face events in Japan. As the case in past years, an internet search remains the dominant way eligible applicants learn about the scholarship.

This year, 41 Japanese nationals applied, of which eight applicants were eligible. Among the 33 ineligible applicants, 27 lacked the required three years of development-related work experience, two lacked admission to a university, two lacked a qualified recommendation letter, and three currently work for the Government of Japan. Note that applicants can be disqualified for more than one reason.

Following on the footsteps of the last two cohorts in which the Scholarship Program received more women than men eligible applications, this year four of the eight eligible applicants are women. Eligible applicants this year also continued the trend of applicants' preferences to study in the US, UK and Europe.

With this low volume of eligible applications, JJWBGSP was in the unfortunate position this year of not meeting the target of 15 scholarships, and instead awarded scholarships to all 8 eligible applicants from Japan.

Partnership Program: Outreach and Selection

Outreach activities are led by partnership universities, and the JJWBGSP Secretariat posts announcements for their calls for scholars on the World Bank website. All partners except the Universities of Kinshasa, Makerere and Yaounde supplied enough eligible applications for the awarding of JJWBGSP scholarships for the 2019 cohort.

Preferred Program: Outreach and Selection

Outreach

The 2019 call for applications for scholarships to preferred master's degree programs was disseminated widely through the Bank's internal and external channels. Figure 2 provides the breakdown of how applicants in 2019 heard about the scholarship to preferred master's degree programs.

Selection

As illustrated in Figure 3, the selection of JJWBGSP scholarships to preferred programs is quite competitive, with thousands of applications submitted. Note that the decline in applications since 2017 is due to a procedural change, and not to a decline in demand for the JJWBGSP scholarships. Starting in 2018, JJWBGSP scholarship applicants must upload a letter of acceptance from a preferred program before submitting their scholarship application. Prior to 2018, this requirement was imposed later in the review process for the subset of high quality semi-finalists.

For the 2019 cohort, JJWBGSP processed a total of 3,235 applications, of which 2,278 applications were determined to be ineligible. The reasons of ineligibility are specified in Table 3 below, noting that each applicant can have multiple reasons for ineligibility.

Figure 2. How Developing Country Eligible Applicants to Preferred Programs Heard about the Scholarship Program, 2019 (percent)

Figure 3. Preferred Program Applicants and Awards, 2013-2019

Table 3: Reasons why Applications Identified as Ineligible, 2019

Reason for Ineligibility	# Applications	% of all ineligible applications
No Letter of Admission or Conditional Letter	838	33%
Does not fulfill employment requirements	613	24%
Lack of bachelor's degree before May 2016	498	19%
Application Incomplete	363	14%
Wrong type of Recommendation	79	3%
No Bachelor Degree	145	6%
Citizenship of a developed country	1	0%
Relatives of or WBG staff or ED member	15	1%
Receive Japanese funds for prior graduate degree	1	0%

Among the remaining 957 eligible applications, the Steering Committee approved the highest qualified 56 finalists following the selection process described in Annex 1. Salient features of this year's pool of finalists include:

- 70% of finalists' father's education is below the university level, including 20% of finalists whose father has no education (Figure 4).
- This year while only about 32% of the total of eligible applicants were females; their share amongst the finalist is 43%.
- There is a good geographic spread across finalists, with 28 countries represented in the pool of 56 finalists.
- Keeping with the aim of maintaining a geographical distribution of all JJWBGSP awards that takes into account the distribution of the world's population, Table 4 shows that the origin of a large majority of eligible applicants (56%) is coming from Africa, while the larger part of the finalists is coming from South Asia (41%), followed by Africa (21%), East Asia and the Pacific (13%) Latin America and the Caribbean Region and the Middle East and North Africa regions (9% each), and East and Central Asia (7%).
- Almost three-fourths of the finalists are coming from a career in government, including the Central Bank (Figure 5).

III. Administration of the Scholarship Program: Improved Operational Efficiency and Quality Enhancements

A key mandate of the JJWBGSP Secretariat is to ensure that JJWBGSP offers to the World Bank's developing country clients the choice of study among a high quality / cost-effective pool of master's degree programs offered at the world's high-quality universities and in a wide range of prevalent and emerging development topics, with no specific regional or country orientation. Therefore, while operational efficiency remains a core objective of the JJWBGSP Secretariat, the substantial efficiency gains achieved over the past 5-6 years has enabled the JJWBGSP Secretariat, under the guidance of the JJWBGSP Steering Committee, to initiate in 2019 the task of designing and implementing competitive processes to select a new set of partnership and preferred master's degree programs with demonstrated capability to: (i) admit a highly qualified and diverse pool of mid-career professionals devoted to their country's development and who also meet JJWBGSP's eligibility criteria; and (ii) deliver cost effective master's degree program(s) that equip these scholars with knowledge and skills that will enhance their capacity to contribute to efforts to alleviate poverty and broaden shared prosperity in their developing country. This selected set of master's degree programs affiliated with JJWBGSP may or may not include those among the set of preferred and partner programs currently affiliated with JJWBGSP. The aim is to complete this task by end-December 2019.

Annex 1: JJWBGSP Application and Selection Processes

The Program's application and selection process varies slightly across the three subprograms, but has not changed since 2017.

a) Partnerships and Preferred Programs

Applicants wishing to apply for scholarships through the Partner and Preferred Programs must meet the JJ/WBGSP eligibility criteria:

- Be a national of a World Bank member country
- Not hold dual citizenship with a developed country
- Be in good health
- Hold a bachelor's (or equivalent) degree earned at least three years prior to the application deadline
- Have three years or more of recent development-related experience after earning a bachelor's (or equivalent) degree
- Be accepted unconditionally to enroll in the upcoming academic year for a master's degree in at least one of the JJ/WBGSP Preferred or Partner Programs
- Not be an executive director or alternate, a staff member under any type of appointment of the World Bank Group, or a close relative of the aforementioned by blood or adoption

Preferred Program applicants submit their JJWBGSP scholarship application after being admitted unconditional to a preferred masters degree program. . For each partner program, the partner university first short-lists eligible candidates, who are then invited by the JJWBGSP Secretariat to apply for a scholarship.

In 2014, the program launched an online application system to manage the intake and review of applications for the Preferred Program, and then expanded the system in 2016 to include the Partnership Program.

The selection process is similar across both programs, with applications for scholarships processed through a multilevel screening process. First each application is screened to determine if it meets the eligibility criteria. Each eligible application is reviewed and scored by two independent expert reviewers, to identify those candidates who have the highest potential to influence development after completion of their graduate studies. In addition to the scoring, geographic and gender balances are considered, as well as applicants' socioeconomic background in identifying the finalists. The finalists from the Preferred Program are presented once per year to the JJ/WBGSP Steering Committee (composed of members of the World Bank Board of Directors and World Bank management) for final review and selection of the recipients. The finalists from the Partner program are cleared by the Steering Committee on a rolling basis throughout the year.

b) Japan Nationals Program

Japan Nationals must meet the following eligibility criteria:

- Be a Japanese national
- Be in good health
- Hold a bachelor's (or equivalent) degree earned at least three years prior to the application deadline

- Be a current graduate student or be accepted unconditionally to enroll in an upcoming academic year for a graduate degree in a development field
Have at least 3 years of full-time paid development-related experience since earning a Bachelor's degree (or equivalent university degree) and within the past six years from the date of the Application Deadline
- Not employed by the Government of Japan or its related agencies, including local governments and the Central Bank at the time of application
- Not be an executive director or alternate, a staff member under any type of appointment of the World Bank Group, or a close relative of the aforementioned by blood or adoption,
- Have not received any scholarship funds from the Government of Japan to help finance a graduate degree

In 2017, an online application system was created and launched to manage the intake and review of applications for the Japan Nationals Program. The selection of finalists from Japan is conducted in two phases. First, two highly experienced reviewers assessed the applications for eligibility and merit. The program manager creates a list of finalists based on the reviewers' inputs. And presents the list of finalists to the Steering Committee for approval once per year.
