# THE VALUE OF BENCHMARKING

You [Socrates] have discovered the reasons why some farmers are so successful that husbandry yields them all they need in abundance, and others are so inefficient that they find farming unprofitable. I should like to hear the reasons in each case, in order that we may do what is good and avoid what is harmful.

# DESIGN TO ANALYSIS

# DATA COLLECTION CHALLENGES

- **Unavailability** of data (laws, regulations, metrics)
- Statistical **unreliability** or weakness of data
- **Incomparability** of data (varying collection methodology)
- **Reluctance** to provide certain information
- **Limited contributor base** to verify data (time & motion)
- Specific **case study assumptions** need to be refined for time and motion indicators
- **Extensive follow up** to obtain data
