A World Bank Presentation

### A Presentation of the new World Bank study, “Open Skies for Africa: Implementing the Yamoussoukro Decision”

World Bank air transport specialist Charles Schlumberger will present key findings and recommendations of a new study that calls on African countries to open their air service markets to foreign operators, with liberalized tariffs, fair competition and compliance with established ICAO safety standards and practices. Delegates attending the ICAO-McGill University Worldwide Conference “Air Transport: What Route to Sustainability” are invited to participate. Questions and comment will be invited.

#### Presentation
