Message from the READ Trust Fund Program Manager

Dear Colleagues,

We are excited to share the fourth edition of the READ 2 Trust Fund newsletter with you. In this newsletter, we highlight the impressive progress and achievements that countries receiving support from the READ 2 Trust Fund have made since the launch of the country grants in the spring of 2017. We also highlight the important work to improve the student assessment system that is taking place in Nepal, one of the READ 2 Trust Fund countries.

In October 2017, the second annual READ 2 Council Meeting took place in Moscow, Russia. The READ 2 RAS, READ 2 Trust Fund, and CICED teams had an opportunity to update the READ Council on the READ 2 program activities, to receive feedback from the Council on the progress of the program and on the upcoming activities, and to discuss possible forward-looking priorities of the program. The meeting was very successful, and the Council noted that implementation progress of the READ 2 program is satisfactory.

We would also like to introduce you to Victoria Levin, Senior Economist, who has just joined the World Bank's Education Global Education and Knowledge (GEAK) unit and the READ 2 Trust Fund Program as a co-Task Team Leader. Victoria most recently was part of the World Bank's Europe and Central Asia Social Protection and Jobs Department, where she focused on issues related to skills development and measurement, including fielding of socio-emotional skills training for job seekers in Turkey and an innovative skills household survey in Bulgaria. We are very excited to have Victoria as part of our team.

In 2017, the READ 2 program has supported important initiatives at the country and global levels, and we are looking forward to seeing the exciting activities and important impact of the READ 2 program in 2018. We hope you and your families have a happy and healthy holiday season, and wish you all the best in the new year!

Warm regards,

Julia Liberman

"Better assessment for better learning"
Strengthening the Student Assessment System in Nepal

Strengthening the student assessment system is one of the key reforms of the Nepal School Sector Development Program. The objective of this reform is to independently assess student learning, to use assessment results to modify government policies and programs, and to align incentives in the education system for enhancing learning opportunities for students … read more
