On 3rd and 4th February 2016, the World Bank, will host a Global Conference on “Improving efficiency in Health”. The Conference will provide an opportunity for all to assess where we are, evaluate recent developments and lessons learnt, and collectively chart a course forward. The first day will focus on “Efficiency in HIV Responses” while on the second day the focus shifts to “Efficiency in other Areas of Health, such as TB, Nutrition, Child Health and Hepatitis C.”

For the two days, the Global Conference on “Improving efficiency in Health” will provide delegates with:

- Over 20 knowledgeable and experienced speakers
- 4 expert specialist panel discussions
- Breakaway sessions looking at new modeling approaches in TB, Nutrition, Child Health and Hepatitis C

Come and join speakers and panellists from the World Bank, WHO, UNAIDS, various Universities, country and regional representatives and other organizations share experiences and participate in robust discussions on how modelling influences resource allocations, future directions for efficient health efforts and what it takes to bring about real change in health responses.

Lunch will be served on both days, and a reception is planned for Wednesday evening.
