Mihály Fazekas

Assistant Professor, Central European University
Non-resident Research Fellow, University of Cambridge (UK)
Senior Research Associate, The University College London

Mihály Fazekas is an assistant professor at the Central European University, School of Public Policy, with a focus on using Big Data methods to understand the quality of government globally. He is also the scientific director of an innovative think-tank, the Government Transparency Institute, while serving as a non-resident research fellow at the University of Cambridge and senior research associate at the University College London. He has a PhD from the University of Cambridge where he pioneered Big Data methods to measure and understand high-level corruption in Central- and Eastern Europe.

His research and policy interests revolve around corruption, favoritism, private sector collusion, and government spending efficiency. Methodologically, he has experience in both quantitative and qualitative methods in diverse fields such as public policy, economics, and political science. He worked at the University of Cambridge as the scientific coordinator of the Horizon 2020 funded project DIGIWHIST which used a Big Data approach to measuring corruption risks, administrative capacity, and transparency in public procurement in 33 European countries. He also serves as a co-Principal Investigator on the British Academy/DFID funded research project looking at anti-corruption in development aid funded procurement.

He regularly consults the European Commission, Council of Europe, EBRD, OECD, World Bank, and range of national governments and NGOs across the globe. Together with Bence Tóth and István János Tóth, he was awarded on two occasions the first prize in the U4 Anti-Corruption Resource Centre competition for the best new proxy measure of corruption.
