**PROJECT NAME**

Assessment & Development of the Current NDC Partnership Plan

**GRANT OBJECTIVE AND ACTIVITIES**

The project seeks to consolidate and scale up emerging efforts in the Dominican Republic to promote a long-term vision for net zero emissions and climate resilient growth, aligning the country’s development strategies with its *Nationally Determined Contribution*. The emissions profile of different sectors will be studied to develop different scenarios for a long-term strategy (LTS) for decarbonization and strengthen the synergy between mitigation and adaptation policies. The LTS will enable the country’s NDC to be updated based on climate data and support the government in unlocking private sector investment. Likewise, the project is aimed at strengthening national and sub-national institutions for climate governance.

The project also aims to enable the country to develop investment finance instruments in collaboration with the IFC, engaging a multiple range of stakeholders such as those in the commercial banking sector. The Dominican Republic is a member of the *NDC Partnership* and the support is part of the Climate Action Enhancement Package.

**COUNTRY FOCAL POINTS**

Ministry of Environment and Natural Resources, Ministry of Economy, Planning and Development

**WORLD BANK GROUP PRACTICE**

- Energy & Extractives
- Transport
- Environment and Natural Resources
