**Calculation of the cluster averages:**

- **a/:** For calculation of the cluster averages, all criteria are equally weighted within a cluster.
- **b/:** Overall rating is calculated as the mean of the score of four clusters.
- **c/:** For more information, see Annex 2 in “Towards 2030: Investing in Growth, Resilience and Opportunity”.
- **d/:** Calculated as follows: (24% Clusters A,B,C average) + (68% Cluster D average) + (8% Portfolio Rating). If portfolio rating is not available, then: (32% Clusters A,B,C average) + (68% Cluster D average). For inactive countries, this rating is shown as “na”.
- **Portfolios on each axis on a 1.0 to 6.0 scale (except Portfolio Ratings which range from 2.5 to 4.5).**
