

The MENA CSP Knowledge and Innovation Program,  
from the World Bank and the Clean  
Technology Fund:

A three-year Program launched  
in late 2016 to bring financial  
and technical advice to  
government utilities and  
industries around the MENA  
region to facilitate CSP  
investment decisions.

# Activities under the Program

**Activity 1:** In depth Technical Assistance: Provide the in-depth technical assistance MENA governments and utilities need to make specific decisions about CSP planning and investments

**Activity 2:** Just-In Time Assistance : making available experts to answer questions on CSP development via phone, e-mail, and web-based platform

**Activity 3:** Knowledge Exchange and Cooperation: Events to bring together decision makers and stakeholders to distill lessons from the MENA CSP experience. **Workshop at Noor, March 6-8 2017**

**Activity 4:** Capacity Building and Training: training on CSP-related topics, and support to the development of training from national facilities.

**Activity 5:** Knowledge Dissemination and Website: Newsletters to disseminate information from the Knowledge and Innovation program. A Web-based platform to link project sponsors, governments, financiers, investors, and technology and service providers to help development of CSP projects.
