[Policy and Strategic Behavior in Water Resource Management](#), Edited by **Ariel Dinar** and Jose Albiac. London; Sterling, VA : Earthscan, 2009.

WORLD BANK REPORTS

WDR 2010: Development and Climate Change

The main message of the report is that a "climate-smart" world is possible if we act now, act together, and act differently.

WDR 2009: Reshaping Economic Geography

Places do well when they promote transformations along the dimensions of economic geography: higher densities as cities grow; shorter distances as workers and businesses migrate closer to density; and fewer divisions as nations lower their economic borders and enter world markets to take advantage of scale and trade in specialized products. WDR 2009 2009 concludes that the transformations along these three dimensions of density, distance, and division are essential for development and should be encouraged.

WDR 2003: Sustainable Development in a Dynamic World

Without better policies and institutions, social and environmental strains may derail development progress, leading to higher poverty levels and a decline in the quality of life for everybody, according to this report.
