Comment 1	Kate Robinson	United Kingdom	Thank you to the project team for their response to our questions. The UK is how happy to approve this proposal, however, we do believe that more should be done on sharing the learning from this project. I've attached some proposed additions to the answer provided by the World Bank on M&E, detailing how we think learning could be strengthened but we'd like the project team to consider this further and then come back to us with their proposal at a later date.
