# Japan's Investment in Human Capital

Japan's commitment to the development of human resources in developing countries is rooted in its own experiences after World War II. The country's startling postwar economic growth and its fundamental transformation from World Bank recipient to major World Bank donor were grounded in the rapid growth of its broad human resource base. This distinct development pathway has led Japan in its desire to support the poorest countries in their endeavors to enhance the expertise and skill levels of aspiring practitioners and leaders so as to contribute to policy reform for economic growth and social development.

Japan made clear this support when, in 1989, it launched the Policy and Human Resources Development Fund (PHRD), a fund managed by the World Bank that provides assistance for strengthening human resources and institutional capacity in developing countries. Since its inception in 1987, the Joint Japan/World Bank Graduate Scholarship Program (JJ/WBGSP) has been financed by the PHRD fund.

The broad objective of the JJ/WBGSP is to transfer skills and knowledge through graduate studies, with the goal of encouraging and strengthening the development of human resources in developing countries. The program targets midcareer professionals working in development-related fields. Through their studies, scholars are expected not only to improve their skills and knowledge but also to gain new perspectives and insights, enabling them to become active contributors to sustainable socioeconomic reforms.

JJ/WBGSP scholar Linet Ojiambo from Kenya graduating from GRIPS, October 2013. Copyright © 2013 GRIPS All Rights Reserved.

# **2014 Program Highlights and Achievements**

#### **Better Targeting of...**

- ☐ The poorest 37% of scholars—an increase of 10 percentage points from 2013.
- ☐ **Government**—70% of scholars—an increase of 21 percentage points from 2013.
- ☐ African scholars—the program's first African knowledge-sharing forum held in Accra, Ghana.

## Greater Reach...

☐ A new online application system and improved outreach led to a 60% increase in the number of applications received.

# Greater Diversity of...

☐ **Reviewers**—the first reviewers based in developing countries—7 in all.

- □ **Programs**—245 preferred programs on offer to scholars. **Greater Efficiency through...**
- ☐ **Process reforms**—a significant gain in administrative efficiency for future selections and improved fiduciary oversight.

# **Program Description**

From its 1987 inception through its 2014 program, the JJ/WBGSP has awarded 5,486 scholarships to scholars from 149 countries through three subprograms: (1) the Regular Program, (2) the Partnership Program, and (3) the Japanese Nationals Program. These subprograms target similar groups of people but vary slightly in their eligibility criteria and selection processes.

Scholars in all three programs are midcareer professionals from Bank member countries, pursuing graduate studies in development-related university programs abroad. Scholarships are granted for 12 to 24 months; after completion of their studies, scholars from developing countries commit to return to their home countries to work. This commitment ensures that developing countries benefit from scholars' newly acquired knowledge and skills.

Applicants wishing to apply for scholarships through any of these programs must meet the JJ/WBGSP core eligibility criteria. These include being a national of a World Bank member country, holding a bachelor's degree earned at least three years previously, and having at least three years and no more than 20 years of full-time paid work experience acquired after the bachelor degree. Additionally, applicants must be unconditionally admitted into their proposed graduate study program, and cannot be staff or consultants of the World Bank Group, or relatives of the aforementioned.

The selection process for scholars also remains similar across programs, with applications processed through a multilevel screening process. Each application is reviewed by two independent, expert reviewers with the aim of identifying those candidates who have the highest potential to influence development after completion of their graduate studies. Geographic and gender balances are considered, as well as applicants' socioeconomic backgrounds. Once identified, the finalists are presented to the JJ/WBG Steering Committee (composed of members of the World Bank Board of Directors and World Bank management) for final review and selection of the recipients.

Seven 2014 scholars at a welcome reception at Yokohama University, with Professor Yamazaki, director of the Public Policy and Taxation program.

# (1) The Regular Program

The Regular Program is the largest subprogram of the JJ/WBGSP. Sixty-five percent of all scholarships awarded under the program have been awarded under this subprogram (table 1). Scholars in the Regular Program are midcareer professionals from developing countries pursuing master's degrees in subjects related to economic and social development.

*Eligibility Criteria.* In addition to meeting the core JJ/WBGSP eligibility criteria, candidates for the Regular Program must

- Be a national of a World Bank member country that is eligible to borrow
- Have at least three years of post-bachelor experience in development-related work
- Hold paid, full-time employment at the time of application
- Not be a national or dual citizen of a developed country
- Be unconditionally accepted at a preferred master's degree program related to economic or social development

**Preferred University Programs.** Over the years, the JJ/WBGSP has granted 'preferred status' to 245 master's degree programs. All scholars in the Regular Program study at one of 245 preferred master's degree programs. These programs do not have full partnership agreements with the JJ/WBGSP but have been historically included for reasons of scholar demand, geographic balance, and universities' offers of reduced tuition fees. For a complete list of preferred programs, see appendix table B2.9.

Until 2014 the Regular Program was open to applicants who had been accepted to any development-related master program worldwide, although over 90 percent of selected scholars were enrolled at one of the 245 preferred master's degree programs.

In 2014 the program was open only to those applicants accepted at a preferred program. This restriction made the program more efficient and ensured the quality of study for all scholars.

**Selection process.** Candidates to the Regular Program apply through an annual open call for applications. This year the program launched an online intake system, which allows submission of all elements of the application, automated screening for eligibility, and review by a group of external expert reviewers based around the world.

JJ/WBGSP 2013 scholar Saffaa Naffaa from Syria is ready for class at UNESCO-IHE.

# (2) The Partnership Program

The Partnership Program is the second largest subprogram of the JJ/WBGSP. Twenty-nine percent of all JJ/WBGSP scholarships awarded since 1987 have been awarded under this subprogram (see table 1). Scholars in the Partnership Program are midcareer professionals from developing countries who are studying at a JJ/WBGSP partnership program.

*Eligibility Criteria.* Applicants are subject to the same eligibility criteria as for the Regular Program, with the exception that they must be unconditionally admitted and shortlisted by a partner university.

**Partner University Programs.** Since 1992, the JJ/WBGSP has supported partnership programs in cooperation with some of the world's leading universities in Ghana, Côte d'Ivoire, Uganda, Zambia, Democratic Republic of Congo, Cameroon, Canada, France, Japan, and the United States. The tailor-made programs are designed to combine academic rigor

with graduate training in identified practical aspects of development policy making, in areas related to economics and public policy management, public finance and taxation policy, and infrastructure management.

Current participating universities include five in Japan—the University of Tokyo, Yokohama National University, the University of Tsukuba, Keio University, and the Graduate Institute for Policy Studies; two in the United States—Harvard University and Columbia University; and six in Africa—the University of Yaoundé II in Cameroon, the University of Cocody-Abidjan in Côte d'Ivoire, the University of Ghana, Makerere University in Uganda, the University of Zambia, and the University of Kinshasa in the Democratic Republic of the Congo.

Selection process. Applications are submitted directly to the partner universities, which use their own admission criteria and the JJ/WBGSP eligibility criteria to select a shortlist of candidates for the scholarship. Applications shortlisted by the universities are then reviewed by two JJ/WBGSP expert reviewers, and must be approved by the government of Japan cochair of the Steering Committee. Partner program selections are made at different times of the year, depending on each partner's application cycle. The Steering Committee is informed of the selections at the annual meeting. The JJ/WBGSP is considering adopting the online intake system piloted in 2014 for the Regular Program for the submission of partnership applications.

JJ/WBGSP scholars in the MPA/ID partner program at Harvard University

#### What has the JJ/WBGSP experience meant to you?

Before my master's I was a simple agricultural technician in my country. Now my title is rural development engineer and I am head of a food security project in Ati, in the Batha region of Chad. The project builds capacity of farmers' organizations,

encourages the implementation of good practices, and supports local structures for information on food safety/early warning systems.

Perpétue Yamma, Burkina Faso (Montpellier SupAgro, Rural Development)

#### What has the JJ/WBGSP experience meant to you?

Upon returning to Kenya, MPH certificate in hand, I resumed work with my previous employer (KEMRI/CDC) and was soon promoted from a research assistant to a research officer position, a position I currently hold. This was largely driven by the superior quality of education I received during the one year I spent in the United Kingdom, courtesy of the JJ/WBGSP.

Sylvia Omulo, Kenya (Harvard University, Public Health)

# (3) The Japanese Nationals Program

Japanese National scholar Hanae Hayashi at Harvard, 2013

The Japanese Nationals Program is the smallest JJ/WBGSP subprogram. Six percent of all scholarship awardees since 1987 have been Japanese nationals.

Each year through this subprogram the JJ/WBGSP selects a small number of Japanese nationals for scholarships for graduate studies in development-related subjects at institutions outside Japan. These degrees are expected to aid these Japanese scholars in obtaining employment with international organizations or nongovernmental organizations (NGOs) that focus on international development.

*Eligibility Criteria.* In addition to meeting the core JJ/WBGSP eligibility criteria, candidates for the Japanese Nationals Program must

- Be Japanese nationals

- By the application deadline, be either currently enrolled in, or accepted unconditionally at, a development-related graduate program located outside Japan
- Not be employed at the time of application by the government of Japan or its related agencies, including local governments and the central bank
- Not have received any previous scholarship funding from the government of Japan to help finance a graduate degree

**Selection Process.** Applications for these scholarships are submitted to the JJ/WBGSP Secretariat through an open call and a multilevel screening process involving representatives from the government of Japan and experts within the World Bank. The final awards are made by the Steering Committee at its annual meeting.

# The Japan Indonesia Presidential Scholarship Program

As of the international effort to part support Indonesia's higher education system, in 2008 the government of Japan gave a one-time grant of \$10 million through the PHRD fund for scholarships specifically for Indonesian fellows. Through this grant, Japan has supported three cohorts (2008–2010) of 43 Indonesians in undertaking doctoral studies abroad. Each scholar is sponsored by one of the program's nine partner Centers of Excellence, which are located at Indonesian universities and higher education institutes, listed below. After graduating, scholars return to work for the Indonesian university partner that sponsored their study and help to forge a relationship between the Indonesian university and the foreign university. As of September 2014, the JIPS graduate and winner of the L'Oréal-

program has seen 22 scholars graduate and return to UNESCO in scienceNational Fellowship for women Elvi Restiawaty at the work at their supporting institutions. This program is Bandung Institute of Technology in actively disbursing its funds and is no longer accepting Biotechnology. new applicants.

#### The Nine JIPS Centers of Excellence

Bandung Institute of Technology (Biotechnology)
Bogor Agricultural University (Bioenergy)
Bogor Agricultural University (Bioindustry and Business)
Gadjah Mada University (Good Corporate Governance)
Indonesia University of Education (Special Needs Education)
Open University (Distance Learning)
Parahyangan Catholic University (Infrastructure and Urban Development)
Parahyangan Catholic University (Development of Small and Medium Enterprises)
University of Indonesia (Reproductive Health)

# **Program Reach**

In 2014, the JJ/WBGSP awarded 193 new scholarships: 139 for the Regular Program and the Japanese Nationals Program combined, and 54 for the Partnership Programs (figure 1). A look at scholars' backgrounds and profiles shows that they come predominantly from Africa (43 percent), and many are from member countries of the International Development Association. The gender balance is skewed slightly towards men at 59 percent and, in all, 37 percent of scholars come from families in which the father has only primary or no formal education. Seventy percent of scholars come from the public sector, working in either central or local governments. The following sections explore the profile of this year's cohort of scholars in more detail.

Figure 1. Regular and Partnership Programs Awardees by Year, 1987–2014

*Note:* Data for the Regular Program include data for the Japanese Nationals Program.

# **Applicants and Awards (Regular Program)**

In 2014, the JJ/WBGSP received 3,383 applications for the Regular Program, submitted through the new online application system. The initial automated screening found 1,645 applicants ineligible. In the second screening, 15 external reviewers performed online evaluations of the remaining 1,738 applicants (see figure 2). Each application was graded independently by two reviewers and scored from 1 to 10 on the basis of academic excellence, professional experience, quality of professional recommendations, and commitment to the home country. The third screening narrowed the selection down to 124 finalists from 52 countries who were recommended to the Steering Committee for selection, giving priority to the highest ranked candidates with parents who did not attend university, gender balance, and geographic balance.

## What has the JJ/WBGSP experience meant to you?

I graduated with merit with a thesis on "Developing dietary guidelines for child care settings in Bosnia and Herzegovina." Upon graduation I became one of a few trained nutritionists in the country, and one with a clear vision of improving poor nutritional status of Bosnian children and adults.... I currently participate in nutrition policy making on both local and national levels as a member of expert teams.

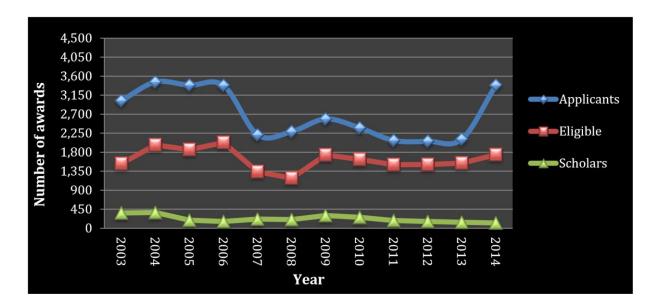

Selma Gicevic, Bosnia and Herzegovina (University of Westminster, Public Health Nutrition)

#### What has the JJ/WBGSP experience meant to you?

All the reflections in Japan are still with me even after such a long period of time. Things we learned in a well-planned manner in the University and National Tax Agency and College have been always very useful for me, in my work here in the Inland Revenue Department, Ministry of Finance.

Ranjith Hapuarachchi, Sri Lanka (Keio University, Taxation Policy and Management)

Figure 2. Regular Program Applicants and Scholarship Awards, 2002-14

Ineligibility Criteria and Online Applications for FY2014 (Regular Program). Of the applicants considered in the first screening, 1,645 were deemed ineligible for not meeting one or more criteria (figure 3). The large increase in the number of ineligible applications this year was due in part to the ease of submitting applications through the online system, making speculative and incomplete applications more likely. Indeed, 40 percent of ineligible applicants submitted incomplete applications: they did not provide the required professional reference letters. Another 10 percent of applicants did not meet the required number of years of work experience. Twenty-six percent of applicants were found to be ineligible because they earned bachelors' degrees after 2011.

Percent

One or zero professional/academic reference letters

Earned bachelor's degree after 2011

Currently not a full-time employee

Less than 3 years of full-time paid employment

No bachelor's degree

Figure 3. Reasons for Ineligibility: Data on Regular Program, 2014

*Note:* Data for Regular Program include data for Japanese Nationals Program.

# Geographic Distribution (Regular and Partnership Programs)

Historically the JJ/WBGSP has had difficulty reaching applicants from Europe and Central Asia and from the Middle East and North Africa, so in 2014 significant effort was put into targeted outreach to these regions. Unfortunately, these efforts did not increase the number of eligible applications from these regions, with 63 percent of applicants from Africa, 15 percent from South Asia, 8 percent from East Asia and the Pacific, 7 percent from Latin America and the Caribbean, 4 percent from the Middle East and North Africa, and 3 percent from Europe and Central Europe. Additional efforts will be required to improve uptake from these regions next year. In this regard, region-specific data that the program acquired on how applicants heard about the scholarship will be helpful in further refining the outreach strategy.

Because of the skewed regional distribution of eligible applications, regional spread became an important criterion in the selection of applicants this year, to maintain a good distribution of awards by region (figure 4). Africa continues to produce the largest number of scholars, with 43 percent of awardees in 2014, compared with 44 percent in 2013. The two Asian regions—East Asia and the Pacific, and South Asia—have the second and third highest shares of awards, at 12 percent and 19 percent, respectively. As is typical for the program, the least represented regions remain Latin America and the Caribbean, the Middle East and North Africa, and Europe and Central Asia, with 9 percent, 5 percent, and 4 percent of awardees respectively. These figures are comparable to the 2013 figures of 8 percent, 4 percent, and 5 percent.

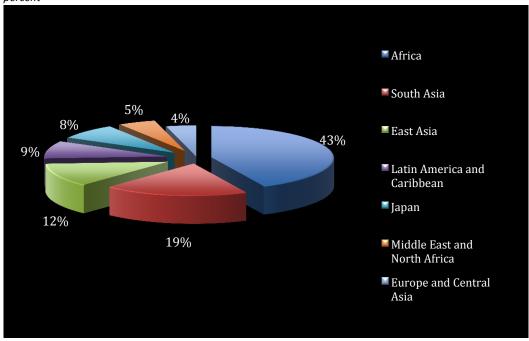

Figure 4. Regular Program and Partnership Programs: Awards Distribution by Home Region, 2014 percent

*Note:* Data for Regular Program include data for Japanese Nationals Program.

# Gender Distribution (Regular and Partnership Programs)

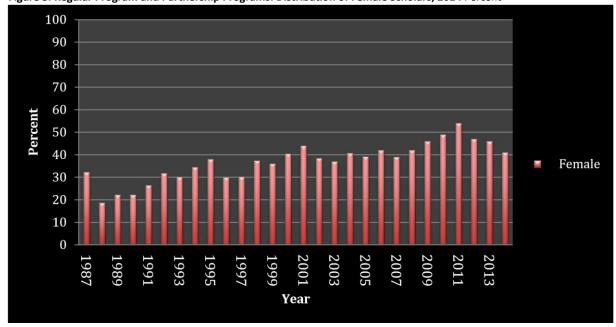

As female applicants have historically been greatly outnumbered by male applicants, at around 30 percent of eligible applicants, the JJ/WBGSP targeted outreach through gender networks for this year's call. However, the percentage of eligible applications from women did not increase, and in fact dropped 5 percentage points from 2013, at 27 percent. The program intends to further strengthen its outreach to women for the next call for applications, using data on the regional breakout of women applicants in 2014 and how they heard about the scholarship (see table 2 and 3).

With women underrepresented in the pool of eligible applications, the JJ/WBGSP has given, and continues to give, priority to women in the selection. The share of women among award recipients has grown rapidly since the program's inception, from a low of 19 percent in 1987 to a high of 54 percent in 2011. Since that year, there has been a slight decline of female awardees, falling back to 41 percent in 2014, as illustrated in figure 5.

Table 2. Regular Program and Partnership Program Awards: Distribution by Gender from Regions, 2014

Figure 5. Regular Program and Partnership Programs: Distribution of Female Scholars, 2014 Percent

Note: Data for the Regular Program includes data for the Japanese Nationals Program.

# **Host Institutions (Regular and Partnership Programs)**

In 2014, universities in Europe, North America, and East Asia received the largest shares of scholarship recipients (42, 30, and 16 percent, respectively) in the Regular and

Partnership Programs, followed by universities in Africa (7 percent) (figure 6). The share of scholars studying in North America, East Asia, and Africa is bolstered by the partnership programs in these three regions, which accounted for 27% of scholarships. The high share of scholars choosing to study in Europe may also be explained by the number of European preferred programs on offer: 60 percent of all programs on the preferred list are located in Europe. See appendix table B2.8 for a complete list of preferred programs.

\* Europe

\*North America

\*East Asia

\*Africa

\*Oceania

\*Latin America & Caribbean

Note: Data for Regular Program include data for Japanese Nationals Program.

#### What has the JJ/WBGSP experience meant to you?

I come from a humble family and am the first person in my extended family to have acquired an education abroad. I am a civil servant from India and am returning to the government of India after completing my master's in public policy.

Aarti Saxena, India (Harvard University, Public Policy)

#### What has the JJ/WBGSP experience meant to you?

I was sponsored to study Development Finance at the University of Reading. Upon returning back to work in my country, I was promoted to a higher grade and in the appraisal exercise at my workplace last year, I was nominated to be among the top five percentile. I attribute this to the knowledge, exposure, and experience gained during my study at the University of Reading.

Jonathan Yusuf, Nigeria (University of Reading, Development Finance)

In awarding scholarships, the JJ/WBGSP considers candidates' socioeconomic status, giving preference to scholars from more disadvantaged backgrounds.

To determine this status, the program uses the highest level of education obtained by candidates' parents, which in most cases pertains to the father. In 2014, among the 124 scholarship awardees in the Regular Program, 31 percent had fathers with a university education and 27 percent had fathers who had attained a secondary education. Thirtyseven percent had fathers who had only a primary education or no formal education at all (figure 7). This last share encompasses those scholars coming from the most disadvantaged backgrounds. This share increased by 10 percentage points from the share in 2013.

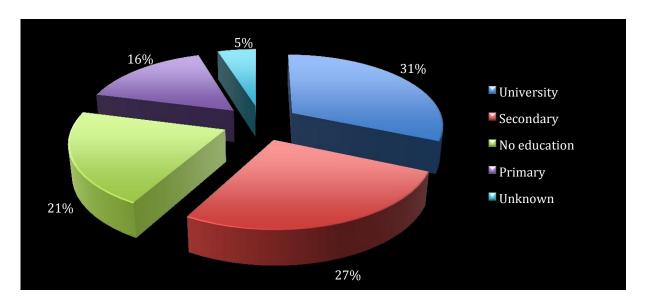

Figure 7. Regular Program Awards: Distribution by Father's Education Level, 2014 percent

# Professional Background (Regular Program)

#### What has the JJ/WBGSP experience meant to you?

Today I submitted my last Tax Policy paper, titled "Challenges and policy suggestions to fight tax evasion and corruption in Lebanon." Nine months ago, this paper would have been impossible to write. I didn't even have the self-confidence to dare and propose such policy solutions. Today, this paper stands as an example of the positive changes that I will be able to make thanks to the support of this scholarship.

> Sarah Bou Atmeh, Lebanon (Williams College, Development Economics)

#### What has the JJ/WBGSP experience meant to you?

The exposure of a graduate degree in public policy and taxation from Japan helped me to further my career as an executive officer in the government of Sri Lanka.

> Sedillage Iyesha Asanthi, Sri Lanka (Yokohama National University, Program in Public Policy and Taxation)

By supporting human resource development through its academic programs, the JJ/WBGSP continues to support institutional capacity building of the public sector and of development-focused organizations. This is illustrated by the employment distribution of the 2014 finalists: 70 percent come from central, state, or provincial governments or central banks of their home countries, and 17 percent work for domestic or international nongovernmental organizations. In addition, 3 percent work in academic or research institutions and another 2 percent work for utility providers (figure 8).

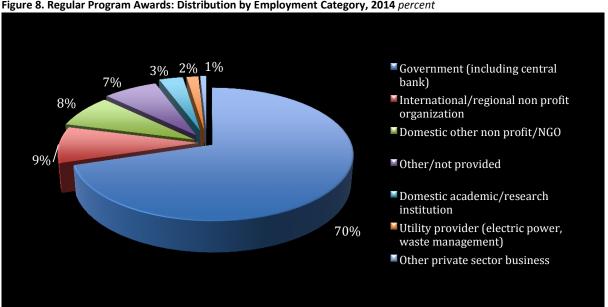

Figure 8. Regular Program Awards: Distribution by Employment Category, 2014 percent

# Fields of Study (Regular and Partnership Programs)

In 2014, reflecting the types of preferred and partner graduate programs offered, the majority of the scholars in the Regular and Partnership Programs pursued studies in public policy and international development (42 percent), economics (25 percent), public health, (8 percent), and environment and natural resources (7 percent). For a complete breakout of the 2014 fields of study, see table 4.

Table 3. Regular and Partnership Programs: Fields of Study, 2014

|   | Number of | Share of     |
|---|-----------|--------------|
| Field                                   | awardees  | awardees (%) |
| Economics                               | 48        | 25           |
| Environment/natural resources           | 14        | 7            |
| Public policy/international development | 82        | 42           |

# ASCEND Initiative: Relationship Building among Donors, Scholars, and Alumni

Recognizing an opportunity to both improve alumni participation and enhance scholar and alumni development knowledge sharing and networking, the JJ/WBGSP launched the Alumni and Scholars Capacity Enhancement Network for Development (ASCEND) Initiative in 2005. Today, the ASCEND Initiative acts as a learning, networking, and outreach arm of the program, enhancing the JJ/WBGSP's development impact, documenting the program's progress and achievements, and strengthening ties to Japan and the World Bank Group.

To achieve its objectives, the ASCEND Initiative organizes face-to-face and online activities that target scholars and alumni (box 1). The initiative also engages the government of Japan and the partnership universities in its activities when appropriate, bolstering these development partnerships.

In 2014, the ASCEND Initiative worked to strengthen its relationships with partner and preferred universities, World Bank programs and events, the Office of the Executive Director of

Box 1. ASCEND for Alumni and Scholars

The ACSEND Initiative offers learning and networking opportunities to both alumni and scholars, with distinct objectives for each group.

#### ASCEND for Alumni:

- Maintain active relationships with alumni to help measure the development impact of the program.
- Offer opportunities for building skills in development implementation and for professional networking, creating strong ties between alumni, scholars, the government of Japan and the World Bank.

#### **ASCEND for Scholars:**

- Maximize benefits that scholars receive from the JJ/WBGSP by facilitating access to global knowledge and professional networking, creating strong ties between scholars, alumni, the government of Japan and the World Bank.
- Better prepare JJ/WBGSP scholars to return home and integrate their newly acquired knowledge and skills into their home countries.

Japan, and the World Bank Tokyo Office. The goal was to add value at minimal cost to the scholars' formal learning programs. Experience suggests that these efforts benefit all parties and help lay a foundation for more robust knowledge exchange in the future.

The following section summarizes the ASCEND activities that were delivered in FY2014, under three categories: training, networking, and outreach and dissemination (activities that fall in more than two categories have been categorized under their main purpose).

IJ/WBGSP scholars and alumni at the 2013 Knowledge Sharing Forum at the University of Ghana

# **Training**

# Knowledge-Sharing Forums for Scholars.

forum in Washington, DC

KSFs provide current scholars opportunities to (1) acquire cutting-edge knowledge in development-related subjects practitioners, (2) acquire knowledge and skills needed to reintegrate into their home countries, and (3) build active networks within the II/WBGSP community and beyond. This past fiscal year, KSFs were delivered at the University of Ghana, in Accra (November 2013), the first ever held in Africa; and at the World Bank Headquarters in Washington, DC (June

2014), for a total of 97 scholars and alumni. Holding a KSF in Ghana also allowed alumni

from Ghana to benefit from this learning and networking opportunity; 11 Ghanaian alumni attended. Topics at both KSFs included leadership for development, open contracting, open governance, and strategic stakeholder engagement. KSFs were designed by LLI experts and delivered each time by LLI local partners. Representatives from the government of Japan—the Japanese ambassador in Ghana—and the alternative executive director to the World Bank in Washington gave opening and closing remarks and interacted with scholars and alumni. A number of alumni shared their experiences with scholars, particularly focusing on the challenges they faced upon returning home. The KSFs this year continued, as in the past, to be rated very highly by participants, with over 80% responding that the KSFs were very useful and significantly helped improve their understanding of leadership in development.

JJ/WBGSP Filipino alumni with Minister Setsuo Ohmori and Mr. Tomonori Sato from the Embassy of Japan in the Philippines and Motoo Konishi, World Bank Country Director, September 2013

# Scholars Participating in the Annual Bank Conference on Development Economics

Following successful collaboration over the past three years in Paris and Washington DC, the Bank's Development Economics Vice Presidency (DEC), invited the JJ/WBGSP's U.S.-based scholars to attend its 2014 Annual Bank Conference on Development Economics (ABCDE) in Washington DC, which dovetailed with the ASCEND KSF. DEC covered all the travel and accommodation costs for 47 scholars to attend the two-day conference in June. The cost of the ASCEND KSF that followed this conference was therefore much reduced, as scholars' travel was already covered. The theme of the ABCDE this year was "The Role of Theory in Development Economics," giving scholars the opportunity to learn from some of world's most prominent development economists and to extend their own professional networks.

JJ/WBGSP Moroccan alumni with Hideaki Suzuki, former the World Bank, October 2013

executive director for Japan to

# **Networking**

# **In-Country Alumni Receptions**

Five alumni networking events were organized—in Sri Lanka, Ethiopia, Morocco, and twice in the Philippines—each attracting about 20 alumni who mingled with each other as well as with representatives from the government of Japan and the World Bank. These receptions offered alumni the opportunity to strengthen their in-country network and to share their post-scholarship achievements with the government of Japan and the World Bank, increasing visibility and support for the program at the country level.

JJ/WBGSP 2014 summer lunch seminar with Mr. Masahiri Kan, executive director for Japan to the World Bank

# Summer Lunch Seminar

Every summer, a number of JJ/WBGSP scholars participate in internships in the Washington, DC area. In 2014, the ASCEND Initiative organized a lunch seminar for these scholars, asking them to share their internship and scholarship experiences as well as their plans after completing their degrees. Eight scholars interning at the World Bank Group attended the seminar and met with their fellow scholars, the executive director for Japan, and Scholarship Program staff.

## LinkedIn Community

All JJ/WBGSP alumni and scholars are encouraged to join the "JJ/WBGSP Alumni and Scholars Network—OFFICIAL" group on LinkedIn, where they can network among themselves as well as receive information and announcements from the JJ/WBGSP Secretariat, including announcements for World Bank eLearning courses. In FY2014, the membership of this group exceeded 1,700, an increase of over 100 new members from the preceding year.

# Outreach and Dissemination in Japan

This past year, the ASCEND Initiative has continued to work with the Bank's Tokyo office to promote the JJ/WBGSP in Japan. A webpage for the Japanese Nationals Program is hosted on the World Bank Tokyo Office's website, and information on the applications for the 2014 cycle was posted and advertised through the Tokyo Office's Facebook page and Twitter. An interview was conducted with a Japanese JJ/WBGSP alumnus now working at the World Bank to illustrate the benefits and uniqueness of the JJ/WBGSP, as well as to provide advice for Japanese nationals who opt to study abroad and who have an interest in working for an international organization such as the World Bank. This interview page was one of the most frequently visited pages in the Tokyo Office's website.

Also, the ASCEND Initiative collaborates with the Bank's Paris Office, which manages the Share University Paper (SUP) Program, an online publication of research papers. The ASCEND Initiative encourages JJ/WBGSP scholars to submit their masters' theses for publication and reviews the papers before they are published on the World Bank's website through the SUP Program.

# **Evaluation of Past KSFs**

In addition to these training, networking, and outreach activities, in FY2014 the ASCEND Initiative also conducted a survey to assess the quality of the results of past KSFs, and to help refine the design of future KSFs. The survey results showed that a majority of the KSF participants improved their capacity at work based on their learning at the KSF – 75% of the respondents had done something new or different owing to what they had learned. They also expressed an increased sense of belonging to the JJ/WBG scholars and alumni community, as well as to the Bank and to Japan, and had made contacts which they maintained as of the survey date. On the basis of these findings, the report concluded that KSFs bring lasting results in imparting skills and knowledge useful to future leaders in the development arena, while also bringing them closer to each other through networking.

# **Improved Operational Efficiency and Quality Enhancements**

Extensive strategic work was undertaken in FY2014 to improve operational efficiency and enhance the program's quality through

- (i) Strengthening strategic partnerships and communications with universities: 25% of applicants learned about the scholarship through these universities in 2014
- (ii) Greater and higher-quality interface between the donor and scholars and alumni, with a record number of five alumni receptions organized this year by ASCEND
- (iii) Improved communications to attract applicants, resulting in a 56% increase in the number of applications as compared with last year
- (iv) Process reforms that result in significant gains in administrative efficiency and improved fiduciary oversight

## Strategic Partnerships and Communications

Donor relations were enhanced through quick and accurate responses to inquiries and timely delivery of products. The legal framework for the program was strengthened by updating the scholar award letter template. Relations with preferred universities were also improved by updating the list of university master programs associated with our Scholarship Program, connecting with the program directors of these master programs to re-establish ties, and improving outreach to potential applicants though two-way links with our website.

## **Communications and Outreach**

The 2014 call for applications was disseminated widely through the Bank's internal and external channels. See figure 9 for a breakdown of how applicants heard about the scholarship in 2014. The external website remains an important tool for reaching applicants, and during the year particular attention was given to enhancing its content. For reasons of transparency the program also published on the website the selection process and the criteria used to assess applications. For the first time, program outreach efforts to attract quality applicants also included

- Creating flyers, tweets, and website-friendly text in the six World Bank languages
- Tapping into the following outlets: (a) the ED offices as a conduit to recruit the most qualified public servants from developing countries; (b) networks for gender (women) and regions (in the Middle East and North Africa, and in Europe and Central Asia) that have historically been under-represented in terms of the diversity of applications; and (c) social media experts and social media outlets
- Clarifying the eligibility criteria and selection criteria used to select scholars in text on the website and other outreach material

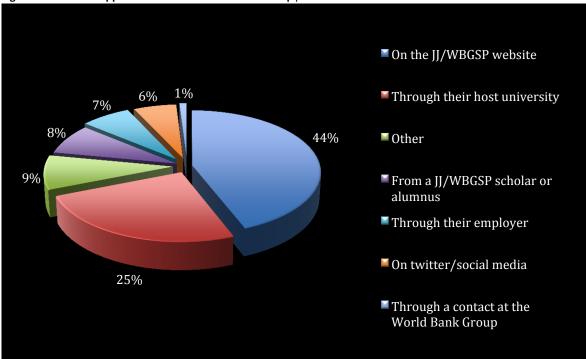

Figure 9. How 2014 applicants heard about the scholarship percent

# **Administrative Efficiencies and Quality Enhancements**

Achievements in 2014 that helped lead to significant gains in efficiency and to significant enhancements of quality included the following:

- Improving trust fund structures and operationalizing the FileMaker database, which made it easy to track scholars and financial commitments and expenditures by cohort
- Switching from a paper-based to an online application system, which enhanced the quality of application processing by eliminating clerical errors and improved

- program efficiency by eliminating the need to hire and supervise temporary data entry staff to process applications
- Enhancing quality of reviewing applications by (a) recruiting reviewers globally rather than only through DC-based hires; (b) revamping the application form and guidelines to improve the relevance and quality of information provided in the application; and (c) revamping the reviewer guidelines and scoring mechanisms to ensure high quality and uniformity in scoring of applications
- Reducing by half the number of transactions required to disburse stipend benefits to scholars
