Principles of Values-based Banking

→ Business model basis for all Global Alliance members
→ Triple Bottom Line is leading
→ Research shows banks operating with these Principles provide better financial returns with lower volatility
→ Full study available
→ Supported by recent study on SASB materiality impact
→ Values-based banking is providing banking services, primarily lending, to individuals and enterprises that deliver value to society in the target areas of:

→ People – Social Empowerment
→ Planet – Environmental Regeneration
→ Prosperity – Economic Resiliency

→ Inherently linked to the Sustainable Development Goals but broader
Values-based Scorecard Objectives

→ The Values-based Scorecard, developed with practitioner knowledge and experience, captures a bank’s vision, strategy and identifiable results from a values-based perspective.

→ The Scorecard allows a bank to assess, compare and enhance its performance from a values-based perspective.

→ The Scorecard does not measure impact but uses a bank’s measures of impact to provide concrete insight into its values-based focus.
The Scorecard is structured to holistically assess a bank using three pillars:

- **Basic Requirements**
  - Regulated Banking Institution
  - Values-based Mission
  - Transparency

- **Quantitative Factors**
  - Financial Viability
  - Real Economy Focus
  - Triple Bottom Line Focus

- **Qualitative Elements**
  - Strategic Direction
  - Implementation
  - Identifiable Results
