In fiscal year (FY) 2018, 32.1 percent of the World Bank Group’s (WBG) financing had climate co-benefits – already exceeding the 28% target set for 2020. This amounted to a record-setting $20.5 billion in climate-related finance delivered in the last fiscal year, of which $15.7 billion came from IBRD and IDA, the World Bank’s main lending arms. This was the result of an institution-wide effort to mainstream climate considerations into all development projects.
