INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT (IBRD), Washington, D.C. 20433 D-91-ES-1 104-ES-3 A mechanical shovel removing rocks which will be pulverized to be used as base for the New Coastal Highway in EL Salvador. This highway was constructed with funds from a WORLD BANK loan to continue the improvement of the highway network in EL Salvador. On November 2, 1962, the International Development Association (IDA), an affiliate of the WORLD BANK, extended a development credit equivalent to $6 million to EL Salvador for improvement and extension of the highway system. The credit is being used for the reconstruction of seven trunk roads, the construction of four new feeder roads, all totaling about 227 miles in length, and the modernization of maintenance operations on the Coastal Highway which extends across the country from Guatemala to Honduras. Photo: Paul Sanche

104-ES-4 A new Pacific Highway is being built along the Pacific coast of El Salvador to open up new agricultural land and to provide new coastal communications. El Salvador is the most densely populated country of Latin America and the highway provides access to the only unused reserves of agricultural land in the country. The WORLD BANK has made a loan of $11.1 million to El Salvador to finance the import of the heavy equipment for the construction of this highway.

Picture shows close-up of man drilling prior to blasting on a section of the Coastal Highway between Izcacuyo and La Libertad.

HOLD FOR RELEASE FOR A.M. PAPERS NOVEMBER 3, 1962

INTERNATIONAL DEVELOPMENT ASSOCIATION (IDA), Washington 25, D. C.

104-ES-16 A young Salvadorian surveyor at work near La Libertad on the new 200-mile Coastal Highway in El Salvador. The construction of this major highway was assisted by funds from two WORLD BANK loans, amounting to $16,100,000, made in 1954 and 1959. On November 2, 1962 the INTERNATIONAL DEVELOPMENT ASSOCIATION (IDA), an affiliate of the WORLD BANK, made an $8 million credit available to El Salvador to support a continuation of the country's highway development program. These funds will be used to construct trunk and feeder roads and for the improvement and expansion of maintenance operations on the Coastal Highway.

HOLD FOR RELEASE TO A.M. PAPERS NOVEMBER 3, 1962

INTERNATIONAL DEVELOPMENT ASSOCIATION (IDA), Washington 25, D. C.

IDA-ES-28 Construction work in progress on the new Coastal Highway in El Salvador. This section of the major highway, between Acajutla and Izatacuyo, clings to the steep cliff face high above the Pacific Ocean. The new 200-mile Coastal Highway was built with the assistance of funds from two WORLD BANK loans, amounting to $16,100,000, made in 1956 and 1959. On November 2, 1962 the INTERNATIONAL DEVELOPMENT ASSOCIATION (IDA), an affiliate of the WORLD BANK, made an $8 million credit available to El Salvador to support a continuation of the country's highway development program. These funds will be used to construct trunk and feeder roads and for the improvement and expansion of maintenance operations on the Coastal Highway.
