SECTION I: HIGHLIGHTS FOR THE FIRST SIX MONTHS OF FY18

This document provides Management's Discussion and Analysis (MD&A) of the financial condition and results of operations for IDA for the six months ended December 31, 2017. Box 1 provides IDA's selected financial data as of and for the six months ended December 31, 2017 (FY18 YTD) and December 31, 2016 (FY17 YTD), as well as for the fiscal years ended June 30, 2014-17. This document should be read in conjunction with IDA's financial statements and MD&A issued for the fiscal year ended June 30, 2017. IDA undertakes no obligation to update any forward-looking statements.

On July 1, 2017, The International Development Association (IDA) commenced its Eighteenth Replenishment of resources (IDA18). Under this replenishment, members have agreed that IDA will make \$75 billion in new commitments over the three year replenishment period, (FY18-FY20). The IDA18 financing framework is an integrated package. It includes an expansion of IDA's business model to access debt from the capital markets, which leverages IDA's strong equity base. See Section III: Funding and Resource Allocation.

Financial Results

Equity (Section IV)

IDA's reported equity increased by \$2.7 billion from \$158.5 billion as of June 30, 2017 to \$161.2 billion as of December 31, 2017. The main drivers of the increase were translation gains and the receipt of contributions from members.

Loans Outstanding (Section IV)

IDA's loan portfolio increased by \$5.4 billion from \$142.2 billion as of June 30, 2017 to \$147.6 billion as of December 31, 2017. This reflects the strong demand for IDA's lending products as measured by lending commitments and net loan disbursement activity.

Investments (Section IV)

As of December 31, 2017, the investment portfolio stood at \$29.3 billion, a decrease of \$0.4 billion compared to June 30, 2017. During this period, IDA financed \$6.2 billion of loan and grant operations and received \$5.4 billion of resources, primarily comprised of \$2.0 billion in cash contributions from members and \$2.5 billion of loan repayments and prepayments. IDA's investments remain concentrated in the upper end of the credit spectrum, with 70% rated AA or above, reflecting IDA's objective of principal protection and resulting preference for high quality investments.

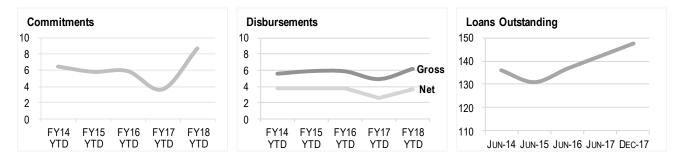

Net Income (Section IV)

For FY18 YTD, IDA reported a net loss of \$2.6 billion. The net reported loss primarily reflects the impact of \$2.5 billion in grants provided to IDA's eligible members. Grants are financed by contributions from members, which are recorded as equity and not reflected in the Statement of Income.

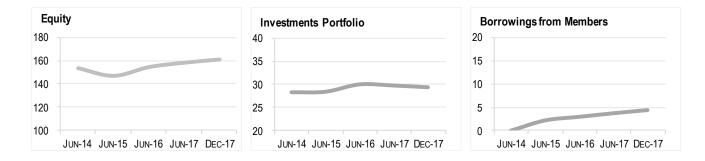

KEY PERFORMANCE INDICATORS

(In billions of U.S. dollars)

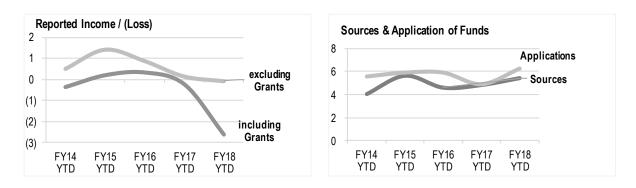

LENDING — During the first six months of FY18, IDA committed \$8.7 billion to help its member countries to finance their development needs. At December 31, 2017, IDA's net loans outstanding amounted to \$147.6 billion, a 4% increase from June 30, 2017. IDA's loans normally disburse over a period of 5 to 10 years, and have repayment periods of up to 40 years.

EQUITY, LIQUIDITY & BORROWINGS – Each successive replenishment has strengthened IDA's equity to finance its operations. IDA has maintained high levels of liquidity in its investment portfolio to ensure that it can meet its liquidity needs, even under potential scenarios of severe market disruptions.

FINANCIAL RESULTS – IDA's reported net losses are primarily driven by its grant activity, as previously discussed.

SECTION II: OVERVIEW

Owned by its 173 members 1, IDA has been providing financing and knowledge services to many of the world's developing countries for more than 56 years. In addition to loans, grants, and guarantees provided to countries to help meet their development needs, IDA leverages its experience and expertise to provide technical assistance and policy advice. It also supports countries with disaster risk financing and insurance against natural disasters and health-related crises, and facilitates financing through trust fund partnerships.

Business Model

IDA has financed its operations over the years with equity. As a result of strong support of member countries, IDA has built up a substantial equity base, amounting to \$161.2 billion as of December 31, 2017. In addition to equity, starting from IDA18, IDA will also be using market debt to finance its operations. As of December 31, 2017, IDA has not raised any debt from the market.

Concessional lending, including grants, is primarily financed by IDA's equity. Non-concessional loans will primarily be financed by market debt. To the extent that market debt will be used to finance concessional lending, it will be blended with member contributions, which will provide an interest subsidy. See **Figure 1.**

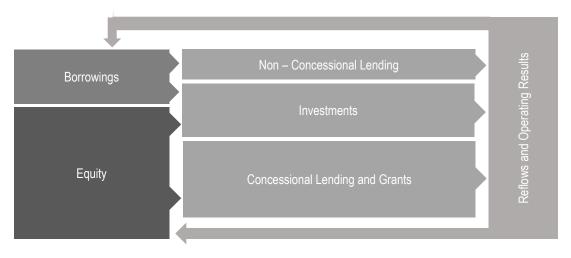

Figure 1: IDA's Business Model

Eighteenth Replenishment of Resources (IDA18)

The IDA18 financing framework represents a fundamental shift in IDA's approach to mobilizing finance since it primarily combines contributions from members (\$27.2 billion) and internal resources (\$21.2 billion), with market debt (\$22.1 billion), thereby allowing IDA to provide US\$75 billion² in financing for its clients.

"Toward 2030: Investing in Growth, Resilience and Opportunity" is the overarching theme for IDA18. Gender and development, climate change, fragility, conflict and violence (FCV), jobs and economic transformation, and governance and institutions, were selected as special themes which will receive extra attention in IDA's normal business of providing country-driven development support.

On November 27, 2017, IDA had received Instruments of Commitment (IoCs) of \$15.1 billion and loan agreements of \$1.1 billion, for a total of \$16.2 billion. This represented 60% of the total member contributions for IDA18, and under the terms of IDA18, this triggered "effectiveness", upon which the resources to be contributed by members, now become payable to IDA.

¹ IDA's members are owners and hold voting rights in IDA. Members do not, however, hold shares in IDA and are therefore not referred to as shareholders. Payments for subscriptions and contributions from members increase IDA's paid-in equity and are financially equivalent to paid-in capital in multilateral development organizations with capital structures.

² IDA's functional currencies are the SDR and its component currencies of U.S. dollar, euro, Japanese yen, pound sterling and Chinese renminbi. For the convenience of its members and other users, IDA's financial statements are reported in U.S. Dollars.

SECTION III: FUNDING AND RESOURCE ALLOCATION

Sources of IDA's Funding

IDA's equity remains strong at \$161.2 billion as of December 31, 2017, as shown in **Table 5.** During FY18 YTD, IDA received \$2.7 billion in subscriptions and contributions, which includes \$0.7 billion in net demand note activity. Demand notes will be encashed over a period of approximately 9 years to finance loan and grant disbursements. In addition to equity, IDA uses internal resources, comprised primarily of repayments and prepayments of loans, to fund its financing activities. During FY18 YTD, IDA received \$2.7 billion of internal resources (see **Table 4**).

Uses of IDA Funding

Concessional financing is provided in the form of loans, grants and guarantees. Eligibility and percentage of allocation for grants for IDA-only countries is based on an assessment of the country's risk of debt distress, where the higher the risk assessment, the greater the proportion of grant financing.

As of December 31, 2017, commitments for concessional financing amounted to \$8.6 billion, of which \$6.1 billion was in the form of loans and \$2.5 billion in the form of grants. Included in these commitments was \$1.3 billion to countries identified as Fragility, Conflict and Violence affected States (FCVs).

Non-Concessional financing comprises loans and guarantees whose terms are aligned with those of IBRD's flexible loans and guarantees. As of December 31, 2017, commitments for non-concessional financing were \$130 million and were entirely for the Scale-up Facility. There were no commitments under the Transitional Support Window.

A \$2.5 billion **IFC-MIGA Private Sector Window** (**PSW**) has been created in IDA18. Its goal is to mobilize private sector investment in the IDA-only and IDA-eligible FCV countries. The PSW is deployed through four facilities: the Local Currency Facility, the Risk Mitigation Facility, the MIGA Guarantee Facility and the Blended Finance Facility. These facilities have been designed to target critical challenges faced by the private sector in these difficult markets and leverages IFC and MIGA's business platforms and instruments. For further details, see Section III: Funding and Resource Allocation of the MD&A for the fiscal year ended June 30, 2017. As of December 31, 2017, the first transaction, a cross-currency swap between IDA and IFC with a notional amount of \$9 million, was issued under the Local Currency Facility.

SECTION IV: FINANCIAL RESULTS

Basis of Reporting

IDA prepares its financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP), referred to in this document as the "reported basis". The financial statements provide a basis upon which users can analyze IDA's sources and uses of resources.

Summary of Financial Results

IDA had a net loss of \$2,621 million in FY18 YTD compared with a net loss of \$255 million in FY17 YTD. The net loss in FY18 YTD was driven by the \$2,529 million of grant activity, primarily in the Africa region, for which IDA is compensated by member contributions that are recorded in equity.

Loans Portfolio and Grant Activity

As of December 31, 2017, IDA's loans outstanding were \$147.6 billion, \$5.4 billion higher than at June 30, 2017. The increase was mainly due to \$2.2 billion of net positive loan disbursements, complemented by currency translation gains of \$3.3 billion, consistent with the 2.4% appreciation of the SDR against the U.S. dollar during the period.

FY18 YTD gross loan disbursements were \$4.7 billion (\$3.9 billion in FY17 YTD), which primarily consisted of \$2.8 billion to the Africa region, \$1.0 billion to the South Asia region, and \$0.6 billion to the East Asia and Pacific region. See **Figure 4**. IDA's loans generally disburse within five to ten years for investment project financing and one to three years for development policy financing. Therefore, FY18 YTD and FY17 YTD disbursements also include amounts relating to commitments made in earlier years.

Figure 3: Loans Outstanding by Region

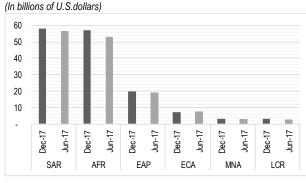

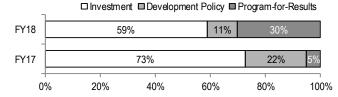

Figure 2, shows the percentage of loans approved for investment financing, development policy operations and Program for Results for FY18 YTD and FY17 YTD.

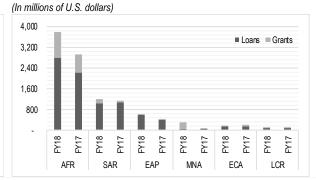

Figure 2: Share of Financing Categories - Year to date

Interest revenue and service charges from loans has increased by \$59 million from FY17 YTD to FY18 YTD. The increase reflects the increase in the overall loan volume. See **Table 3**.

As of December 31, 2017, IDA's payable for development grants was \$7.7 billion, \$1.2 billion higher than as of June 30, 2017. This increase reflects grant expenses of \$2.5 billion in FY18 YTD which were primarily for the Africa region.

Figure 4: Gross Disbursements of Loans and Grants by Region – Year to Date

Regions:

AFR - Africa; EAP - East Asia and Pacific; ECA - Europe and Central Asia; LCR - Latin America and Caribbean; MNA - Middle East and North Africa; SAR - South Asia

Table 3 shows IDA's interest and service charge revenue by loan type. The \$27 million increase in interest revenue and \$32 million increase in service charges is primarily driven by the increased volume of loans.

Table 3: Revenue by Category

a. In addition, \$3 million of commitment charges were earned in FY18 YTD under the Scale-up Facility.

Investment Portfolio

The net investment portfolio remained stable, with a \$349 million decrease from \$29,673 million as of June 30, 2017 to \$29,324 million as of December 31, 2017. The key drivers during the period were:

- The payment of \$6,190 million in loan and grant disbursements.
- The inflow of \$2,472 million in the form of loan repayments and prepayments, included in internal resources.
- The receipt of \$2,036 million relating to member contributions and \$600 million in concessional loans from members.

a. Project Preparation Advances (PPA)

Borrowings from Members

As part of IDA18, five members have agreed to provide loans totaling \$5.2 billion. As of December 31, 2017, IDA had signed a concessional loan agreement totaling \$1.1 billion with one of the five members, of which \$0.6 billion was received as loan proceeds. As of December 31, 2017 total borrowings from members were \$4.3 billion.

Transfers from Affiliated Organizations

On October 13, 2017, IBRD's Board of Governors approved a transfer of \$123 million to IDA, bringing the cumulative transfers to \$15,249 million. This transfer was received on October 24, 2017.

Equity

IDA's equity increased by \$2.8 billion as compared to June 30, 2017, primarily due to \$3.0 billion in subscriptions and contributions paid-in in the form of cash and demand obligations, and a \$3.3 billion increase in accumulated other comprehensive income due to positive translation adjustments on functional currencies as SDR had appreciated by 2.4% against the USD. This was offset by \$2.6 billion of net losses incurred during the year.

The \$2.6 billion increase in the accumulated deficit largely represents the impact of IDA's grant activity during the period, which is funded by member contributions which are recorded as subscriptions and contributions.

Table 5: Changes in Equity

Net Non-Interest Expenses

As shown in **Table 6,** IDA's net non-interest expenses primarily comprise administrative expenses, net of revenue from externally funded activities. IBRD and IDA's administrative budget is a single resource envelope that funds the combined work programs of IBRD and IDA. The allocation of administrative expenses between IBRD and IDA is based on an agreed cost sharing methodology, approved by their Boards, which is driven by the relative level of activities relating to lending, knowledge services, and other services between these two institutions.

IDA's net non-interest expenses were \$741 million for both FY18 YTD and FY17 YTD. The key drivers during the period were i) the increase in costs allocated to IDA under the cost sharing methodology, due to the increase in client engagement activities for IDA18, offset by ii) lower pension costs as a result of lower amortization of unrecognized actuarial losses during FY18 YTD.

Table 6: Net Non-Interest Expenses

Section V: Risk Management

Risk Governance

IDA's risk management processes and practices continually evolve to reflect changes in activities in response to market, credit, product, operational, and other developments. The Board, particularly Audit Committee members, periodically review trends in IDA's risk profiles and performance, and any major developments in risk management policies and controls.

Management believes that effective risk management is critical for its overall operations. Accordingly, the risk management governance structure is designed to manage the principal risks IDA assumes in its activities, and supports Management in its oversight function, particularly in coordinating different aspects of risk management and in connection with risks that are common across functional areas.

IDA's financial and operational risk governance structure is built on the "three lines of defense" principle where:

- Business units are responsible for directly managing risks in their respective functional areas,
- The Vice President and WBG Chief Risk Officer (CRO) provides direction, challenge, and oversight over financial and operational risk activities, and
- Internal Audit provides independent oversight.

IDA's risk management process comprises: risk identification, assessment, response and risk monitoring and reporting. IDA has policies and procedures under which risk owners and corporate functions are responsible for identifying, assessing, responding to, monitoring and reporting risks.

Table 8: Deployable Strategic Capital Ratio

a.TRR will be increased for the \$2.5 billion allocated to the Private Sector Window as it is utilized. At December 31, 2017 \$9 million has been utilized

Risk Oversight and Coverage

Financial and Operational Risk Management

The CRO has an overview of both financial and operational risks. These risks include (i) country credit risks in the core sovereign lending business, (ii) market and counterparty risks including liquidity risk, and (iii) operational risks relating to people, processes and systems. In addition, the CRO works closely with IDA, IBRD, IFC, and MIGA's Management to review, measure, aggregate, and report on risks and share best practices across the WBG. The CRO also helps enhance cooperation between the entities and facilitates knowledge sharing in the risk management function.

Capital Adequacy

IDA's capital adequacy framework is based on an economic capital model, which mandates that IDA holds capital for credit risk, market risk and operational risk covering all activities and assets on its books. The main measure of capital adequacy is Deployable Strategic Capital (DSC), which is the capital available to support future commitments, over and above the current portfolio. IDA is required, by the Board, to keep the DSC at levels greater than or equal to zero percent. As of December 31, 2017, the DSC was 37%, unchanged from June 30, 2017, see Table 8 below.

In addition to the DSC framework, IDA has Board approved policies in place to ensure alignment of its lending and borrowing activities. These policies have informed the prudent capital adequacy and liquidity risk management policies. Included in these policies are asset coverage requirements, where Management will monitor asset and liquidity levels to ensure IDA's ability to satisfy all its borrowing and commitment obligations. See Section IX, Risk Management of IDA's June 30, 2017 MD&A.

Credit Risk

IDA faces two types of credit risk: country credit risk and counterparty credit risk. Country credit risk is the risk of loss due to a country not meeting its contractual obligations, and counterparty credit risk is the risk of loss attributable to a counterparty not honoring its contractual obligations. IDA is exposed to commercial as well as noncommercial counterparty credit risk.

Country credit risk is managed through regular assessments of borrowers' debt sustainability and credit risk. Based on these assessments, to manage overall portfolio risk, the allocation outcomes of the Performance Based Allocation (PBA) and other mechanisms are reviewed to ensure that they are compatible with the Deployable Strategic Capital Framework and Single Borrower Limit (SBL).

As of December 31, 2017, the SBL was \$40 billion (25 percent of the \$161.2 billion of equity as of December 31, 2017). Currently, the maximum country exposure levels compatible with IDA's overall capital adequacy target are lower than the SBL for all IDA-borrowing countries. Consequently, the SBL is not currently a constraining factor.

Probable Losses, Overdue Payments and Non-Performing

When a borrower fails to make payments on any principal, interest or other charges due to IDA, IDA may suspend disbursements immediately on all loans and grants to that borrower. IDA's current practice is to exercise this option using a graduated approach. These practices also apply to member countries eligible to borrow from both IDA and IBRD, and whose payments on IBRD loans may become overdue. It is IDA's practice not to reschedule interest or principal payments on its loans, or participate in debt rescheduling agreements with respect to its loans. As of December 31, 2017, no borrowing countries in IDA's accrual portfolio had overdue payments beyond 90 days.

As of December 31, 2017, approximately 2% of IDA's loans were in nonaccrual status, unchanged from June 30, 2017. (Refer to Note F: Loans and Other Exposures in the Notes to the Condensed Quarterly Financial Statements).

Table 9 provides details of the top five borrowers with the largest loan outstanding balances as of December 31, 2017. These borrowers represented 49% of loans outstanding as of that date.

Commercial Counterparty Credit Risk Exposure

This is the normal risk that counterparties fail to meet their payment obligations under the terms of the contract or other financial instruments. Effective management of counterparty credit risk is vital to the success of IDA's funding, investment, and asset/liability management activities. The monitoring and management of these risks is continuous as the market environment evolves.

The credit quality of IDA's investment portfolio remains concentrated in the upper end of the credit spectrum with 70% of the portfolio rated AA or above as of December 31, 2017, reflecting IDA's continued preference for highly rated securities and counterparties across all categories of financial instruments. Total commercial counterparty credit exposure, net of collateral held, was \$31,436 million as of December 31, 2017.

As a result of IDA's use of mark-to-market collateral arrangements for swap transactions, its residual commercial counterparty credit risk exposure is concentrated in the investment portfolio, in debt instruments issued by sovereign governments, agencies, commercial paper, time deposits, and corporate entities. (Table 10).

For the contractual value, notional amounts and related credit risk exposure amounts by instrument, see the Notes to Financial Statements-Note E- Derivative Instruments.

Market Risk

IDA is exposed to changes in interest and exchange rates. The introduction of market debt financing into IDA's business model from IDA18, will result in additional exposures. Accordingly, IDA has updated its Asset Liability Management (ALM) Framework in order to minimize its exposure to market risk.

Interest Rate Risk

IDA is exposed to interest rate risk due to mismatches between its assets (loans and investment portfolio) and its liabilities (borrowing portfolio) both in terms of maturity and instrument type.

IDA employs the following strategies in its management of interest rate risk:

- The capital adequacy policies factor in the sensitivity to interest rates;
- Matching interest rates between loans and funding to minimize open interest rate positions;
- The funding risk related to the mismatch between the maturity profile of the debt funding and the related loans is monitored through duration measurements and adjustments to capital requirements to cover this risk.

As of December 31, 2017, IDA's overall investment portfolio had a duration of slightly above 2 years. During FY18 YTD, the investment portfolio experienced unrealized mark-to-market losses of \$42 million as compared to unrealized mark-to-market losses of \$387 million in FY17 YTD. The lower losses in FY18YTD were consistent with the smaller increases in interest rates of the major currencies for FY18 YTD. For IDA18, the trading portfolio is gradually being adjusted to reflect the new hybrid financing model. IDA's investment portfolio is being transitioned to a sub-portfolio structure comprised of a Stable portfolio and an Operational portfolio.

Exchange Rate Risk

Changes in exchange rates affect the capital adequacy of IDA when the currency of the equity or debt funding the loan portfolio is different from that of the loan exposure. Accordingly, the aim of IDA's exchange rate risk management under IDA18 is the protection of IDA's financial capacity.

The key element of IDA's foreign exchange risk mitigation framework under IDA18 is the alignment of the currency composition of IDA's equity with that of the currency composition of required capital ("Total Resources Required" measure in the capital adequacy framework).

As part of IDA's currency alignment strategy, IDA uses currency forward contracts to convert members' encashments provided in national currencies into the five currencies of the SDR basket, thereby aligning the currency composition of partner contributions with the net cash outflows relating to loans and grants, which are denominated in SDRs.

The payable leg of the currency forward contracts economically hedging member equity contribution pledges are denominated in non-functional currencies. Accordingly, appreciation (depreciation) of these currencies against the U.S. dollar results in exchange rate losses (gains), which are reported in the Statement of Income. The translation adjustment on future inflows from members is the economic offset to the translation adjustment on non-functional currencies of currency forward contracts. The difference between the reported translation adjustments and the effect of foreign exchange movements on the economic offsets, primarily represent the effect of foreign exchange movements on the member equity contributions in non-functional currencies that are not economically hedged through forward contracts due to their relatively small contribution amount or the unpredictability of the expected payment date. These residual equity contributions are hedged using a currency correlation methodology under the overall currency management framework.

The translation adjustment loss on non-functional currencies of \$172 million in FY18 YTD was due to the appreciation of the majority of the non-functional currencies against the U.S. dollar. This was economically offset by the effect of foreign exchange movements on the future inflows from members, which was a gain of \$191 million in FY18 YTD. In comparison, in FY17 YTD, the translation adjustment gains on non-functional currencies amounted to \$174 million due to the depreciation of the non-functional currencies against the U.S. dollar. This was economically offset by the effect of foreign exchange movements on the future inflows from members, which was a loss of \$209 million in FY17 YTD.

Liquidity Risk

Liquidity risk arises in the general funding of IDA's activities and in managing its financial position. It includes the risk of IDA being unable to fund its portfolio of assets at appropriate maturities and rates, and the risk of being unable to liquidate a position in a timely manner at a reasonable price.

IDA's aggregate liquid asset holdings are to be kept above a specified prudential minimum to safeguard against cash flow interruptions. This minimum is equal to 80% of 24 months of projected net outflows and is reset annually. For FY18, the prudential minimum is \$11 billion. As of December 31, 2017, IDA held \$31.3 billion in the liquid asset portfolio. IDA will hold liquidity above the prudential minimum to ensure sufficient liquidity under a wide range of shock scenarios as well as to give it flexibility in timing its borrowing transactions and to meet working capital needs.

Operational Risk

Operational risk is defined as the risk of financial loss or damage to IDA's reputation resulting from inadequate or failed internal processes, people and systems, or from external events.

IDA recognizes the importance of operational risk management activities, which are embedded in its financial operations. IDA's approach to managing operational risk includes assessing and prioritizing operational risks, monitoring and reporting relevant key risk indicators, aggregating and analyzing internal and external events, identifying emerging risks that may affect business units, and developing risk response and mitigating actions. The risk in operations in IDA's lending activities is monitored and supported by the Operations Policy and Country Services (OPCS). This covers risk of non-compliance with IDA's policies, safeguards as well as risk of misprocurement on behalf of clients. Where fraud and corruption risks may impact IDA-financed projects, OPCS and the Integrity Vice Presidency jointly address such issues.

SECTION VI: FAIR VALUE ANALYSIS

Fair Value Results

Fair value reflects the most current and complete expectation and estimation of the value of assets and liabilities. It aids comparability, and can be useful in decision-making. On a reported basis, IDA's loans and borrowings are carried at amortized cost, while all instruments in its investment portfolio (trading and nontrading) are carried at fair value. Whilst IDA intends to hold its loans and borrowings to maturity, a fair value estimate of IDA's financial assets and liabilities along with their respective carrying values is presented in Table 11. The fair value of these instruments is affected by changes in market variables such as interest rates, exchange rates, and credit risk. Management uses fair value to assess the performance of the investment-trading portfolio, and to manage various market risks, including interest rate risk and commercial counterparty credit risk.

Table 11 shows that IDA's equity on a fair value basis (\$135.7 billion) is less than on a carrying value basis (\$161.2 billion). This is primarily due to the \$24.9 billion negative fair value adjustment on IDA's net loans outstanding. This negative fair value adjustment arises due to the concessional nature of IDA's loans; IDA's interest rates are below market rates for the given maturity of its loans and risk profile of the borrowers (concessional).

The fair value of loans is calculated using market-based methodologies - see Notes to Financial Statements-Note F- Loans and Other Exposures. For details on valuation methods and assumptions relating to other fair value disclosures, see Notes to Financial Statements-Note K-Other Fair Value Disclosures. As non-financial assets and liabilities are not reflected at fair value, IDA's equity, as shown in **Table 11**, is not intended to reflect full fair value.

Loans

As of December 31, 2017, there was a \$24.9 billion fair value adjustment on IDA's net loans outstanding bringing the fair value to \$118.8 billion. This compares with a \$26.8 billion adjustment as of June 30, 2017, bringing the fair value to \$111.5 billion at that time. The \$1.9 billion variance in the adjustment is mainly due to changes in the credit risk of the portfolio.

Borrowings

The fair value of borrowings increased from \$4.2 billion as of June 30, 2017 to \$4.9 billion as of December 31, 2017. The increase was primarily driven by the \$0.6 billion in new borrowings during the period.

SECTION VII: GOVERNANCE

External Auditors

The external auditor is appointed to a five-year term, with a limit of two consecutive terms, and is subject to annual reappointment based on the recommendation of the Audit Committee and approval of a resolution by the Board. FY18 is the final year of KPMG LLP's second term as IDA's external auditor.

On November 28, 2017, following a mandatory rebidding of the external audit contract, IDA's Executive Directors approved the appointment of Deloitte as IDA's external auditor for a five-year term commencing FY19.

Notes to Condensed Quarterly Financial Statements

NOTE A—SUMMARY

Basis of Preparation

These unaudited condensed quarterly financial statements should be read in conjunction with the June 30, 2017 audited financial statements and notes included therein. The condensed comparative information that has been derived from the June 30, 2017 audited financial statements has not been audited. In the opinion of management, the condensed quarterly financial statements reflect all adjustments necessary for a fair presentation of IDA's financial position and results of operations in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

Management makes estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the condensed quarterly financial statements and the reported amounts of revenue and expenses during the reporting period. Due to the inherent uncertainty involved in making those estimates, actual results could differ from those estimates. Areas in which significant estimates have been made include, but are not limited to, the provision for losses on loans and other exposures and valuation of certain financial instruments carried at fair value. The results of operations for the first six months of the current fiscal year are not necessarily indicative of the results that may be expected for the full year.

Certain reclassifications of the prior year's information have been made to conform with the current year's presentation.

These financial statements were approved for issue on February 12, 2018 which was also the date through which IDA's management evaluated subsequent events.

Accounting and Reporting Developments

Accounting standards under evaluation:

In May 2014, the Financial Accounting Standards Board (FASB) issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)* and subsequent amendments in 2015 and 2016. The ASUs provide a common framework for revenue recognition for U.S. GAAP and supersede most of the existing revenue recognition guidance in US GAAP. The core principle of the guidance is that an entity recognizes revenue when it transfers control of promised goods and services to customers in an amount that reflects consideration to which the entity expects to be entitled. The ASUs also require additional quantitative and qualitative disclosures to enable financial statement users to understand the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. For IDA, the ASUs are expected to be effective from the quarter ending September 30, 2018.

IDA has evaluated the revenue streams in scope, which largely relate to the provision of technical assistance, knowledge, asset management, and trustee services to clients and donors. It is anticipated that the revenue recognition approaches for the majority of the revenue streams in scope will remain unchanged and continues to evaluate the impact of the ASU on its financial statements.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities. The ASU makes targeted amendments to existing guidance on recognition and measurement of financial instruments that primarily affect the accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for financial instruments. The new guidance requires that changes in the fair value of financial liabilities measured under the fair value option that are attributable to instrument-specific credit risk are reported in Other Comprehensive Income (OCI). For IDA, the ASU will be effective from the quarter ending September 30, 2018 with early adoption permitted for certain provisions. The impact of this ASU on IDA's financial statements and disclosures will be related to the measurement of instrument-specific credit risk for its financial liabilities measured under the fair value option. As of December 31, 2017, IDA did not have any financial liabilities for which the fair value option had been elected.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The ASU introduces a new model for the accounting of credit losses of loans and other financial assets measured at amortized cost. Current U.S. GAAP requires an "incurred loss"

methodology for recognizing credit losses. The new model, referred to as the current expected credit losses (CECL) model, requires an entity to estimate the credit losses expected over the life of an exposure, considering historical information, current information, and reasonable and supportable forecasts. Additionally, the ASU requires enhanced disclosures about credit quality and significant estimates and judgments used in estimating credit losses. For IDA, the ASU is expected to be effective beginning from the quarter ending September 30, 2020, with early adoption permitted. IDA is currently evaluating the impact of the ASU on its financial statements.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. The ASU provides classification guidance on eight specific cash flow classification issues for which current US GAAP does not provide guidance. For IDA, the ASU is expected to be effective from the quarter ending September 30, 2018, with early adoption permitted. IDA has evaluated the ASU and its impact will be limited to the reclassification of certain items on the statement of cash flows, with no net impact on the financial statements.

In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows (Topic 230): Restricted cash.* The ASU requires that the amounts of restricted cash and cash equivalents are included in the total of cash and cash equivalents at the beginning and end of the period in the statement of cash flow. For IDA, the ASU is expected to be effective from the quarter ending September 30, 2018, with early adoption permitted. IDA has evaluated the ASU and determined that there will be no material impact on its financial statements.

NOTE B-MEMBERS' SUBSCRIPTIONS AND CONTRIBUTIONS, AND MEMBERSHIP

Subscriptions and Contributions: The movement in Subscriptions and Contributions paid-in for the six months ended December 31, 2017, and for the fiscal year ended June 30, 2017, is summarized below:

Beginning of the fiscal year	De	December 31, 2017		
	\$	215,403	\$	208,430
Cash contributions received		1,109		2,963
Demand obligations received		1,612		4,014
Translation adjustment		293		(4)
End of the period/fiscal year	\$	218,417	\$	215,403

During the six months ended December 31, 2017, IDA encashed demand obligations totaling \$927 million.

NOTE C-INVESTMENTS

The investment securities held by IDA are designated as either trading or non-trading. These securities are carried and reported at fair value, or at face value which approximates fair value.

As of December 31, 2017, the majority of IDA's Investments comprised government and agency obligations (79%), with all the instruments being classified as either Level 1 or Level 2 within the fair value hierarchy. As of December 31, 2017, U.S. Government instruments represented the largest holding of a single counterparty, and amounted to 17% of the Investments Trading.

A summary of IDA's Investments as of December 31, 2017 and June 30, 2017, is as follows:

In millions of U.S.dollars

	Decen	June 30, 2017		
Trading				
Government and agency obligations	\$	25,550	\$	25,341
Time deposits		5,061		4,783
Asset-backed securities (ABS)		650		705
	\$	31,261	\$	30,829
Non-trading (at fair value)				
Debt securities		887		960
Total	\$	32,148	\$	31,789

IDA manages its investments on a net portfolio basis. The following table summarizes IDA's net portfolio position as of December 31, 2017 and June 30, 2017:

In millions of U.S. dollars

		ember 31, 2017	June 30, 2017		
Investments

a. These relate to To-Be-Announced (TBA) Securities.

IDA uses derivative instruments to manage currency and interest rate risk in the investment portfolio. For details regarding these instruments, see Note E—Derivative Instruments.

As of December 31, 2017, there were short sales totaling \$80 million (\$77 million—June 30, 2017) included in Other liabilities on the Condensed Balance Sheet. These are reported at fair value on a recurring basis.

b. This amount is included in Unrestricted cash under Due from Banks on the Condensed Balance Sheet.

c. This amount is included in Other assets on the Condensed Balance Sheet.

d. This amount is included in Other liabilities on the Condensed Balance Sheet.

^{*} Indicates amount less than \$0.5 million.

Fair Value Disclosures

The following tables present IDA's fair value hierarchy for investment assets and liabilities measured at fair value on a recurring basis as of December 31, 2017 and June 30, 2017:

In millions of U.S. dollars

4 - 5 years		105		113		
Thereafter		305		359		
	\$	903	\$	969		

Valuation Methods and Assumptions

Summarized below are the techniques applied in determining the fair values of investments.

Investment securities

Where available, quoted market prices are used to determine the fair value of trading securities. Examples include most government and agency securities and futures contracts.

For instruments for which market quotations are not available, fair values are determined using model-based valuation techniques, whether internally-generated or vendor-supplied, that include the standard discounted cash flow method using market observable inputs such as yield curves, credit spreads, and constant prepayment spreads. Where applicable, unobservable inputs such as constant prepayment rates, probability of default, and loss severity are used.

Unless quoted prices are available, time deposits are reported at face value, which approximates fair value, as they are short term in nature.

Securities purchased under resale agreements, securities sold under repurchase agreements, and securities lent under securities lending agreements

These securities are of a short term nature and are reported at face value, which approximates fair value.

Commercial Credit Risk

For the purpose of risk management, IDA is party to a variety of financial transactions, certain of which involve elements of credit risk. Credit risk exposure represents the maximum potential loss due to possible nonperformance by obligors and counterparties under the terms of the contracts. For all securities, IDA limits trading to a list of authorized dealers and counterparties. In addition, credit limits have been established for counterparties by type of instrument and maturity category.

Swap Agreements: Credit risk is mitigated through a credit approval process, volume limits, monitoring procedures and the use of mark-to-market collateral arrangements. IDA may require collateral in the form of cash or other approved liquid securities from individual counterparties to mitigate its credit exposure.

IDA has entered into master derivative agreements which contain legally enforceable close-out netting provisions. These agreements may further reduce the gross credit risk exposure related to the swaps. Credit risk with financial assets subject to a master derivatives arrangement is further reduced under these agreements to the extent that payments and receipts with the counterparty are netted at settlement. The reduction in exposure as a result of these netting provisions can vary due to the impact of changes in market conditions on existing and new transactions. The extent of the reduction in exposure may therefore change substantially within a short period of time following the balance sheet date. For more information on netting and offsetting provisions, see Note E—Derivative Instruments.

IDA did not receive the collateral in relation to swap transactions as of December 31, 2017 and June 30, 2017.

Securities Lending: IDA may engage in securities lending and repurchases, against adequate collateral, as well as securities borrowing and reverse repurchases (resales) of government and agency obligations, and ABS.

These transactions have been conducted under legally enforceable master netting arrangements, which allow IDA to reduce its gross credit exposure related to these transactions. As of December 31, 2017, amounts which could potentially be offset as a result of legally enforceable master netting arrangements were \$199 million (\$225 million—June 30, 2017).

Transfers of securities by IDA to counterparties are not accounted for as sales as the accounting criteria for the treatment as a sale have not been met. Counterparties are permitted to repledge these securities until the repurchase date.

Securities lending agreements and repurchase agreements expose IDA to several risks, including counterparty risk, reinvestment risk, and risk of a collateral gap (increase or decrease in the fair value of collateral pledged). IDA has procedures in place to ensure that trading activity and balances under these agreements are below predefined counterparty and maturity limits, and to actively monitor net counterparty exposure, after collateral, through daily mark-to-market. Whenever the collateral pledged by IDA related to its borrowings under securities lending agreements and repurchase agreements declines in value, the transaction is re-priced as appropriate by returning cash or pledging additional collateral.

The following is a summary of the carrying amount of the securities transferred under repurchase or securities lending agreements, and the related liabilities:

	In millions	of	U.S.	dollars
--	-------------	----	------	---------

	December 31, 2017		June .	30, 2017	Financial Statement Presentation
Securities transferred under repurchase or securities lending agreements	\$	2,765	\$	2,150	Included under Investments - Trading on the Condensed Balance Sheet
Liabilities relating to securities transferred under repurchase or securities lending agreements	\$	2,771	\$	2,560	Included under Securities Sold under Repurchase Agreements, Securities Lent under Securities Lending Agreements, and Payable for Cash Collateral Received on the Condensed Balance Sheet.

As of December 31, 2017, none of the liabilities relating to securities transferred under repurchase or securities lending agreements remained unsettled at that date (\$388 million—June 30, 2017). Of this, no amounts represented replacement trades entered into in anticipation of maturing trades of a similar amount (\$368 million—June 30, 2017).

The following table presents the disaggregation of the gross obligation by class of collateral pledged and the remaining contractual maturities for repurchase agreements or securities lending transactions that are accounted for as secured borrowings:

In millions of U.S.dollars

-			As of Dec	ember 31, 20	017	
		Remaining c	ontractua	I maturity of	the agreer	nents
		night and ntinuous	Up to	o 30 days		Total
Repurchase or Securities Lending agreements Government and agency obligations	\$	1,381	\$	1,390	\$	2,771
Total liabilities for Securities sold under repurchase agreements and Securities Lent under Securities Lending Agreements	<u>\$</u>	1,381	\$	1,390	\$	2,771
In millions of U.S.dollars			As of lu	20 2017		
	As of June 30, 2017 Remaining contractual maturity of the agreements					
	Overnight and continuous			o 30 days		Total
Repurchase or Securities Lending agreements Government and agency obligations	\$	1,699	\$	861	\$	2,560
Total liabilities for Securities sold under repurchase agreements and Securities Lent under Securities Lending Agreements	¢	1.699	\$	861	\$	2.560

In the case of resale agreements, IDA received collateral in the form of liquid securities and is permitted to repledge these securities. While these transactions are legally considered to be true purchases and sales, the securities received are not recorded on IDA's balance sheet as the accounting criteria for treatment as a sale have not been met. As of December 31, 2017, none of the securities purchased under resale agreements remained unsettled on that date (Nil—June 30, 2017). For the securities purchased under resale agreements, IDA received securities with a fair value of \$205 million (\$244 million—June 30, 2017). Out of this amount, no securities had been transferred under repurchase or securities lending agreements (Nil—June 30, 2017).

NOTE D—BORROWINGS

IDA's borrowings comprise concessional partner loans made by IDA members. These borrowings are unsecured and unsubordinated fixed rate debt in SDR component currencies. IDA may prepay some or the entire outstanding amounts without penalty. These borrowings are carried and reported at amortized cost.

As of December 31, 2017, IDA's borrowings outstanding were \$4,330 million (\$3,660 million—June 30, 2017). These borrowings have original maturities of 25 and 40 years, with the final maturity being 2057. This excludes the amounts relating to proceeds received under the grant component of the concessional partner loan agreements, for which voting rights have been provided. These amounts are reflected in equity.

In millions of U.S dollars

			Borro	owings outstanding		
	Principal at face value		Net unamortized premium (discount)		Total	
December 31, 2017	\$	5,562	\$	(1,232)	\$	4,330
June 30, 2017	\$	4,392	\$	(732)	\$	3,660

Fair Value Disclosures

The table below presents the fair value of IDA's borrowings for disclosure purposes, along with their respective carrying amounts as of December 31, 2017 and June 30, 2017:

In millions of U.S dollars

	December 31, 2017				June 30, 2017					
	Carrying Value		Fair Value		Carrying Value		Fair Value			
Borrowings outstanding	\$	4,330	\$	4,944	\$	3,660	\$	4,175		

As of December 31, 2017, IDA's borrowings were classified as Level 2 within the fair value hierarchy.

Valuation Methods and Assumptions

The fair value of IDA's borrowings is calculated using a discounted cash flow method which relies on market observable inputs such as yield curves, foreign exchange rates, basis spreads and proxy funding spreads.

NOTE E—DERIVATIVE INSTRUMENTS

IDA uses derivative instruments in its investment portfolio to manage currency and interest rate risks, for asset-liability management purposes, and to assist clients in managing risks.

The following table summarizes IDA's use of derivatives in its various financial portfolios.

Portfolio	Derivative instruments used	Purpose/Risk being managed				
Risk management purposes:						
Investments—Trading	Interest rate swaps, currency forward contracts, currency swaps, options, swaptions, futures contracts, and TBA securities	Manage currency and interest rate risk in the portfolio.				
Other assets/liabilities	Currency forward contracts	Manage foreign exchange risks.				
Other purposes:						
Client operations	Structured swaps	Assist clients in managing risks.				

The following tables provide information on the fair value amounts and the location of the derivative instruments on the Condensed Balance Sheet, as well as the notional amounts and credit risk exposures of those derivative instruments, as of December 31, 2017 and June 30, 2017:

In millions of U.S. dollars

	Condensed Balance Sheet Location								
	Derivative assets				Derivative liabilities				
	December 31, 2017		June 30, 2017		December 31, 2017		June 30, 2017		
Derivatives not designated as hedging instruments

Client Operations				
Structured swaps				
Notional principal		-		68
Credit exposure		-		-

a. Exchange traded instruments are generally subject to daily margin requirements and are deemed to have no material credit risk. All options and futures contracts are interest rate contracts.

Under most of its derivative agreements, IDA is not required to post collateral as long as it maintains liquidity holdings at predetermined levels that are a proxy for a triple-A credit rating. After becoming a rated entity, IDA has started to enter into derivative agreements with commercial counterparties in which IDA is not required to post collateral as long as it maintains a triple-A rating. The aggregate fair value of all derivative instruments with credit-risk related contingent features that are in a liability position as of December 31, 2017 is \$742 million (\$366 million —June 30, 2017). As of December 31, 2017, IDA was not required to post any collateral in accordance with the relevant agreements.

If the credit-risk related contingent features underlying these agreements were triggered to the extent that IDA would be required to post collateral as of December 31, 2017, the amount of collateral that would need to be posted would be \$23 million (\$82 million—June 30, 2017). Subsequent triggers of contingent features would require posting of additional collateral, up to a maximum of \$742 million as of December 31, 2017 (\$366 million—June 30, 2017).

b. These relate to TBA securities.

^{*} Indicates amount less than \$0.5 million.

Amounts of gains and losses on the Asset-liability management derivative instruments and their location on the Condensed Statement of Income during the three and six months ended December 31, 2017 and December 31, 2016 are as follows:

In millions of U.S. dollars

		Gains (Losses)										
			onths Ended mber 31,	Six Months Ended December 31,								
	Condensed Statement of Income Location	2017	2016	2017	2016							
Derivatives not designated as hedging instruments and not held in a trading portfolio ^a												
Currency forward contracts and currency swaps	Unrealized mark-to-market (losses) gains on non-trading portfolios, net	\$ (32)	\$ (56)	\$ 26	\$ (60)							

a. For alternative disclosures about trading derivatives, see the following table.

The majority of the instruments in IDA's investment portfolio are held for trading purposes. Within the trading portfolio, IDA holds highly rated fixed income instruments as well as derivatives. The trading portfolio is primarily held to ensure the availability of funds to meet future cash flow requirements and for liquidity management purposes.

The following table provides information on the amount of gains and losses on IDA's investment trading portfolio (derivative and non-derivative instruments), and their location on the Condensed Statement of Income during the three and six months ended December 31, 2017 and December 31, 2016:

In millions o	f U.S. dollars

Offsetting assets and liabilities

IDA enters into International Swaps and Derivatives Association, Inc. (ISDA) master netting agreements with substantially all of its derivative counterparties. These legally enforceable master netting agreements give IDA the right to liquidate securities held as collateral and to offset receivables and payables with the same counterparty, in the event of default by the counterparty.

The presentation of derivative instruments is consistent with the manner in which these instruments are settled. Interest rate swaps are settled on a net basis, while currency swaps are settled on a gross basis.

The following tables summarize information on derivative assets and liabilities (before and after netting adjustments) that are reflected on IDA's Condensed Balance Sheet as of December 31, 2017 and June 30, 2017. Total derivative assets and liabilities are adjusted on an aggregate basis to take into consideration the effects of legally enforceable master netting agreements. The net derivative asset positions have been further reduced by the cash and securities collateral received.

a. These relate to TBA securities.

Inter-level transfers

During the six months ended December 31, 2017 and December 31, 2016, there were no inter-level transfers in the derivative portfolio.

Valuation Methods and Assumptions

Derivative contracts include currency forward contracts, TBA securities, swaptions, exchange traded options and future contracts, currency swaps and interest rate swaps. These are valued using the standard discounted cash flow methods using market observable inputs such as yield curves, foreign exchange rates and basis spreads and funding spreads.

NOTE F-LOANS AND OTHER EXPOSURES

Loans and other exposures are generally made directly to member countries of IDA. Other exposures include irrevocable commitments, guarantees and repaying project preparation facilities. Loans are carried and reported at amortized cost. Of the total loans outstanding as of December 31, 2017, 91% were to the South Asia, Africa, and East Asia and Pacific regions combined.

Based on IDA's internal credit quality indicators, the majority of the loans outstanding are in the Medium and High risk classes.

As of December 31, 2017 loans outstanding totaling \$2,575 million (representing about 2% of the portfolio) from five borrowers, were in nonaccrual status.

^{*} Indicates amount less than \$0.5 million.

Credit Quality of Sovereign Loans

IDA's country risk ratings are an assessment of its borrowers' ability and willingness to repay IDA on time and in full. These ratings are internal credit quality indicators. Individual country risk ratings are derived on the basis of both quantitative and qualitative factors. For the purpose of analyzing the risk characteristics of IDA's exposures, exposures are grouped into three classes in accordance with assigned borrower risk ratings which relate to the likelihood of loss: Low, Medium and High risk classes, as well as exposures in nonaccrual status.

IDA's borrowers' country risk ratings are key determinants in the provisions for loan losses.

IDA considers a loan to be past due when a borrower fails to make payment on any principal, service, interest or other charges due to IDA, on the dates provided in the contractual loan agreements.

The following tables provide an aging analysis of loans outstanding as of December 31, 2017 and June 30, 2017:

In millions of U.S. dollars

								Dece	mbe	er 31, 201	7

Accumulated Provision for Losses on Loans and Other Exposures

Provision for Losses on Loans and Other Exposures

Management determines the appropriate level of accumulated provision for losses, which reflects the probable losses inherent in IDA's exposures. Probable losses comprise estimates of losses arising from default and nonpayment of principal amounts due, as well as present value losses. Management reassesses the adequacy of the accumulated provision and the reasonableness of the inputs used, on a periodic basis, at least annually, and adjustments are recorded as a charge against or addition to revenue.

In light of the IDA18 replenishment which commenced from July 1, 2017, IDA's management is reviewing its approach to the credit risk rating of IDA's sovereign borrowers. As of December 31, 2017, the potential net impact of this refinement on IDA's accumulated provision is not expected to be material.

Provision for HIPC Debt Initiative and MDRI includes provisions that are based on quantitative and qualitative analyses of various factors, including estimates of Decision Point and Completion Point dates. These factors are reviewed periodically as part of the reassessment of the adequacy of the accumulated provision for loss. Provisions

are released as qualifying debt service becomes due and is forgiven under the HIPC Debt Initiative, and are reduced by the amount of the eligible loans written off when the country reaches Completion Point, and becomes eligible for MDRI debt relief.

Changes to the accumulated provision for losses on loans and other exposures for the six months ended December 31, 2017 and the fiscal year ended June 30, 2017 are summarized below:

In millions of U.S. dollars

			Decembe	er 3	31, 2017					June 30	, 20	17

During the six months ended December 31, 2017 and the fiscal year ended June 30, 2017, there were no loans written off under the MDRI.

Overdue Amounts

As of December 31, 2017, there were no principal or charges under loans in accrual status which were overdue by more than three months.

The following tables provide a summary of selected financial information related to loans in nonaccrual status as of December 31, 2017 and June 30, 2017 and for the three and six months ended December 31, 2017 and December 31, 2016:

In millions of U.S. dollars

	Three r	nonths ended	Decemb	er 31,	Six	months end	ded Ded	cember 31,
		2017	20	016		2017		2016
Service charge revenue not recognized as a								
result of loans being in nonaccrual status	\$	5	\$	5	\$	10	\$	9

During the six months ended December 31, 2017 and December 31, 2016, no loans were placed into nonaccrual status.

During the three and six months ended December 31, 2017, no service charge revenue was recognized on loans in nonaccrual status (\$1 million and \$1 million—three and six months ended December 31, 2016, respectively).

Guarantees

Guarantees of \$1,282 million were outstanding as of December 31, 2017 (\$1,177 million—June 30, 2017). This amount represents the maximum potential undiscounted future payments that IDA could be required to make under these guarantees, and is not included on the Condensed Balance Sheet. The guarantees issued by IDA have original maturities ranging between 9 and 22 years, and expire in decreasing amounts through 2035.

As of December 31, 2017, liabilities related to IDA's obligations under guarantees of \$102 million (\$96 million—June 30, 2017), have been included in Other liabilities on the Condensed Balance Sheet. These include the accumulated provision for guarantee losses of \$19 million (\$19 million—June 30, 2017).

During the six months ended December 31, 2017 and December 31, 2016, no guarantees provided by IDA were called.

Segment Reporting

Based on an evaluation of its operations, Management has determined that IDA has only one reportable segment.

Loan revenue comprises service charges and interest charges on outstanding loan balances. For the six months ended December 31, 2017, loan revenue from three countries of \$120 million, \$87 million and \$69 million, respectively were in excess of 10 percent of total loan revenue.

b. For December 31, 2017, represents the average for the six months ended that date (June 30, 2017 - represents the average for the fiscal year then ended).

c. Loan loss provisions are determined after taking into account accumulated provision for debt relief.

The following table presents IDA's loans outstanding and associated loan revenue as of and for the six months ended December 31, 2017 and December 31, 2016, by geographic region:

In millions of U.S. dollars

		Decem	ber 31, 20	017	December 31, 2016						
Region	Loans Outstanding			Service and Interest Charges		Loans Outstanding		Service and Interest Charges

Total	\$	147,634	\$	669	\$	133,279	\$	610			

Fair Value Disclosures

IDA's loans are carried out and reported at amortized cost. The table below presents the fair value of loans for disclosure purposes, along with their respective carrying amounts as of December 31, 2017 and June 30, 2017:

In millions of U.S dollars

		December 3	1, 201	7		June 30,	2017	
	Carryii	ng Value	Fa	air Value	Carr	ying Value	Fá	air Value
Net Loans Outstanding	\$	143,671	\$	118,785	\$	138,351	\$	111,539

As of December 31, 2017, IDA's loans are classified as Level 3 within the fair value hierarchy.

Valuation Methods and Assumptions

The fair value of loans is calculated using market-based methodologies which incorporate the respective borrowers' Credit Default Swap (CDS) spreads and, where applicable, proxy CDS spreads. Basis adjustments are applied to market recovery levels to reflect IDA's recovery experience.

NOTE G—AFFILIATED ORGANIZATIONS

IDA transacts with affiliated organizations as a recipient of transfers and grants, administrative and derivative intermediation services as well as through cost sharing of IBRD's sponsored pension and other postretirement plans.

Transfers and Grants

Cumulative transfers and grants made to IDA as of December 31, 2017 were \$ 19,068 million (\$18,945 million—June 30, 2017). Details by transferor are as follows:

In millions of U.S dollars

Transfers from	ng of the I year	ers during period	Ena	of period
Total	\$ 18,945	\$ 123	\$	19,068
Of which from: IBRD	15,126	123		15,249
IFC	3,592	-		3,592

Receivables and Payables

As of December 31, 2017 and June 30, 2017, the total amounts receivable from or (payable to) affiliated organizations comprised:

In millions of U.S. dollars

	D	ecemi	ber 31, 20	017			June 30	0, 2017	
	IBRD		IFC		Total	IBRD		FC	 Total
Administrative Services ^a	\$ (336)	\$	-	\$	(336)	\$ (368)	\$	-	\$ (368)
Derivative Transactions									
Receivable	6,077		9		6,086	6,717		-	6,717
Payable	(5,914)		(9)		(5,923)	(6,559)		-	(6,559)

	\$ 530	\$	887	\$	1,417	\$ 485	\$	960	\$ 1,445

a. Includes \$121 million as of December 31, 2017 (\$103 million-June 30, 2017) receivable from IBRD for IDA's share of investments associated with Post-Retirement Contribution Reserve Fund (PCRF).

The receivables from (payables to) these affiliated organizations are reported in the Condensed Balance Sheet as follows:

Receivables / Payables related to:	Reported as:
Receivable for pension and other postretirement benefits	Receivable from affiliated organization
Receivables (payables) for derivative transactions	Derivative assets/liabilities – Asset-liability management
Payable for administrative services ^a	Payable to affiliated organization

a. Includes amounts receivable from IBRD for IDA's share of investments associated with PCRF. This receivable is included in Receivable from affiliated organization on the Condensed Balance Sheet.

Administrative Services: The payable to IBRD represents IDA's share of joint administrative expenses, net of other revenue jointly earned. The allocation of expenses is based upon an agreed cost sharing formula, and amounts are settled quarterly. Beginning from the period ending September 30, 2016, the allocation of expenses jointly incurred by IBRD and IDA also includes Contributions to special programs.

For the three and six months ended December 31, 2017, IDA's share of joint administrative expenses totaled \$445 million and \$858 million, respectively (\$451 million and \$841 million—three and six months ended December 31, 2016, respectively).

Other revenue: Includes IDA's share of other revenue jointly earned with IBRD during the three and six months ended December 31, 2017 totaling \$71 million and \$118 million, respectively (\$63 million and \$100 million—three and six months ended December 31, 2016, respectively). The allocation of revenue is based upon an agreed revenue sharing formula, and amounts are settled quarterly.

For the three and six months ended December 31, 2017 and December 31, 2016, the amount of fee revenue associated with services provided to other affiliated organizations is included in Other revenue on the Condensed Statement of Income, as follows:

In millions of U.S dollars

	Three	Three Months Ended December 31,						ber 31,
	20)17	2	016	20	17	2016	
Fees charged to IFC	\$	18	\$	16	\$	32	\$	29
Fees charged to MIGA		1		1		2		2

Pension and Other Postretirement Benefits: The receivable from IBRD represents IDA's net share of prepaid costs for pension and other postretirement benefit plans and Post-Employment Benefits Plan (PEBP) assets. These will be realized over the lives of the plan participants.

Derivative transactions: These relate to currency forward contracts entered into by IDA with IBRD acting as the intermediary with the market and primarily convert donors' expected contributions in national currencies under the Sixteenth and Seventeenth replenishments of IDA's resources into the five currencies of the SDR basket.

On December 22, 2017, as part of the local currency facility under Private Sector Window, IDA entered into a currency swap agreement with IFC for a period of 12 years. IDA will pay IFC a fixed rate of 2.49% annually on a U.S. dollars notional of 9 million and will receive 3.27% annually on a West African CFA franc (XOF) notional of 5,000 million. As of December 31, 2017, the derivative had a fair value of less than \$1 million.

Investments

During the fiscal year ended June 30, 2015, IDA purchased a debt security issued by IFC for a principal amount of \$1,179 million, amortizing over a period of 25 years. The investment carries a fixed interest rate of 1.84% and has a weighted average maturity of four years. As of December 31, 2017, the principal amount due on the debt security was \$903 million, and it had a fair value of \$887 million. The investment is reported under Investments in the Condensed Balance Sheet. During the three and six months ended December 31, 2017, IDA recognized interest income of \$5 million and \$9 million, respectively on this debt security (\$5 million and \$10 million—three and six months ended December 31, 2016 respectively).

NOTE H—DEVELOPMENT GRANTS

A summary of changes to the amounts payable for development grants for the six months ended December 31, 2017, and for the fiscal year ended June 30, 2017, is presented below:

In millions of U.S dollars

	Decem	ber 31, 2017	June	e 30, 2017
Balance, beginning of the fiscal year	\$	6,583	\$	6,099
Commitments		2,529		2,627
Disbursements (including PPAb grant activity)		(1,530)		(2,105)
Translation adjustment		160		(38)
Balance, end of the period/ fiscal year	\$	7,742	\$	6,583

a. Includes \$50 million contribution to Pandemic Emergency Financing Facility (PEF) which will be expensed when the amounts are disbursed from PEF Financial Intermediary Funds.

For the fiscal years ending June 30, 2018 and June 30, 2017, the commitment charge rate on the undisbursed balances of IDA grants has been set at nil percent.

NOTE I—PENSION AND OTHER POSTRETIREMENT BENEFITS

IBRD, along with IFC and the Multilateral Investment Guarantee Agency, sponsor a defined benefit Staff Retirement Plan and Trust, a Retired Staff Benefits Plan and Trust and a PEBP that cover substantially all of their staff members.

While IDA is not a participating entity to these benefit plans, IDA shares in the costs and reimburses IBRD for its proportionate share of any contributions made to these plans by IBRD, as part of IBRD's allocation of staff and associated administrative expenses to IDA based on an agreed cost sharing ratio.

During the three and six months ended December 31, 2017, IDA's share of IBRD's benefit costs relating to all three plans totaled \$84 million and \$161 million, respectively (\$111 million and \$210 million—three and six months ended December 31, 2016, respectively).

The cost of any potential future liability arising from these plans would be shared by IBRD and IDA using the applicable share ratio.

NOTE J—ACCUMULATED OTHER COMPREHENSIVE INCOME

Comprehensive income consists of net income (loss) and other gains and losses affecting equity that, under U.S. GAAP, are excluded from net income (loss). For IDA, comprehensive income (loss) is comprised of net income (loss) and currency translation adjustments on functional currencies. These items are presented in the Condensed Statement of Comprehensive Income.

b. Project Preparation Advances (PPA)

The following table presents the changes in Accumulated other comprehensive income balances for the six months ended December 31, 2017 and December 31, 2016.

In millions of U.S dollars

 Six Months Ende	ed December 3	31,
 2017		2016
\$ (2,039)	\$	(1,219)

Valuation Methods and Assumptions

As of December 31, 2017 and June 30, 2017, IDA had no financial assets or liabilities measured at fair value on a non-recurring basis.

For additional fair value disclosures regarding Investments, Borrowings, Derivative assets and liabilities and Loans, refer to Note C—Investments, Note D—Borrowings, Note E—Derivative Instruments and Note F—Loans and other exposures, respectively.

Due from Banks: The carrying amount of unrestricted and restricted cash is considered a reasonable estimate of the fair value of these positions.

Unrealized Mark-to-Market Gains (Losses) on Trading and Non-Trading Portfolios, Net

The following table reflects the components of the unrealized mark-to-market gains or losses on IDA's trading and non-trading portfolios, net, for the three and six months ended December 31, 2017 and December 31, 2016.

NOTE L—CONTINGENCIES

From time to time, IDA may be named as a defendant or co-defendant in legal actions on different grounds in various jurisdictions. IDA's Management does not believe the outcome of any existing legal action, in which IDA has been named as a defendant or co-defendant, as of and for the six months ended December 31, 2017, will have a material adverse effect on IDA's financial position, results of operations or cash flows.

Independent Auditors' Review Report

President and Board of Executive Directors International Development Association:

Report on the Financial Statements

We have reviewed the condensed financial statements of the International Development Association (IDA), which comprise the condensed balance sheet as of December 31, 2017, the related condensed statement of income and comprehensive income for the three- and six-month periods ended December 31, 2017 and the related condensed statement of changes in accumulated deficit and cash flows for the six-month period ended December 31, 2017. The accompanying condensed statements of income and comprehensive income for the three- and six-month periods ended December 31, 2016 and the related condensed statements of changes in accumulated deficit and cash flows for the six-month period ended December 31, 2016 of IDA were not reviewed by us, and accordingly, we do not express any form of assurance on them.

Management's Responsibility

IDA's management is responsible for the preparation and fair presentation of the condensed financial information in accordance U.S. generally accepted accounting principles; this responsibility includes the design, implementation, and maintenance of internal control sufficient to provide a reasonable basis for the preparation and fair presentation of interim financial information in accordance with U.S. generally accepted accounting principles.

Auditors' Responsibility

Our responsibility is to conduct our review in accordance with auditing standards generally accepted in the United States of America applicable to reviews of interim financial information. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States of America, the objective of which is the expression of an opinion regarding the financial information. Accordingly, we do not express such an opinion.

Conclusion

Based on our review, we are not aware of any material modifications that should be made to the condensed financial information referred to above for it to be in accordance with U.S. generally accepted accounting principles.

Report on Condensed Balance Sheet as of June 30, 2017

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the balance sheet as of June 30, 2017, and the related statements of income, comprehensive income, changes in accumulated deficit earnings, and cash flows for the year then ended (not presented herein); and we expressed an unmodified audit opinion on those audited financial statements in our report dated August 3, 2017. In our opinion, the accompanying condensed balance sheet of IDA as of June 30, 2017, is consistent, in all material respects, with the audited financial statements from which it has been derived.
