

The World Bank's **Transforming Egypt's Healthcare System** US\$ 530 million project was launched in 2018 to support ongoing efforts to improve Egypt's healthcare system and build human capital as one of the key foundations for growth and prosperity. The project is being implemented over the course of 5 years.

## • Project Objectives

The project aims to benefit **55 Million** Egyptians by 

→ Improving quality of services at ←

**600**  
primary healthcare facilities

**27**  
hospitals

→ Supporting Egypt's family planning efforts through a **US\$35 Million** intervention which will

**Hire 500**  
female family planning doctors  
to deliver care in a way that is suitable  
to the conservative cultures of some areas

**Train 2,800**  
community health workers  
to promote better prenatal and antenatal health and nutrition

**Boost supply**  
for family planning interventions  
through providing birth control methods at a minimal cost

**Boost demand**  
for family planning interventions  
through mass media awareness campaigns and local community  
campaigns which include door-to-door visits from  
community health workers

Conducting the largest screening campaign of its kind, named

**100 Milyon Seha**   
or **100 Million Healthy Lives**

campaign which aims to

**Screen 53 million**  
citizens and residents

for Hepatitis C, non-communicable diseases  
and risk factors

Treat an estimated  
**2.2 million**

Hepatitis C patients

→ Scaling up ←  
the community health workers program

to promote better health, nutrition  
and family planning interventions

→ Screening 1 million ←  
units of blood annually

using Nucleic Acid Testing to ensure that blood units  
are infection free and ready for use in  
the national blood repository
